

# Immunotherapy Toxicities: Checkpoint Inhibitors

## Presented By:

Amy DiMaggio, MSN, RN, CMSRN, OCN

## Learning Objectives

Upon completion of the activity the learner will be able to:

1. Define the function of the immune system
2. Describe the type, mechanism of action, and indication for immunotherapy
3. Identify common and rare toxicities associated with checkpoint inhibitors
4. Recall methods of patient education surrounding immunotherapy toxicities

## Contact Hours

In support of improving patient care, the University of Pittsburgh is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

The maximum number of hours awarded for this Continuing Nursing Education activity is 0.5 contact hour.

To receive credit, the learner must view module, successfully pass knowledge assessment, and complete evaluation.

## Disclosure of Conflicts of Interest:

All individuals in a position to control the content of this education activity are required to disclose all relevant financial relationships with any proprietary entity producing, marketing, re-selling, or distributing health care goods or services, used on, or consumed by, patients.

The following information was provided:

Amy DiMaggio and the planning committee for this activity did not have any relevant financial relationships with a commercial interest.
