

Morris and Carolyn Barkon Lectureship in Gynecological Oncology Survivorship
March 24, 2021
Zoom

Program overview

Lymphedema is a common and nearly inevitable consequence of treatment in many settings of gynecological oncology. The program will provide an overview of the problem, current treatment strategies, and an optimistic look to the future.

Learning objectives

Participation in this program will enable the participant to recognize the risks of lymphedema in cancer treatment and to recognize the clinical presentation of these patients. Risk reduction and management strategies will be covered

Target Audience

Physicians
Nurses
Physical therapists
Other Health Care Professionals
