This presentation will focus on the effects of moral injury from trauma (causal mechanisms, symptoms, behavior manifestation, psychosocial effects, and interventions). The demographic focus will be veterans with military sexual trauma, children of veterans, and family systems.

It will address the gap in services as well as barriers faced. It will end with methods and current programs to address this void in interventions.

Learning objectives:

- Articulate the definition and effects of Moral Injury (PTSD vs. Moral Injury, manifestations, symptoms)
- Describe the effects of Moral Injury on the family systems
- Discusses what interventions and tools are available to address Moral Injury.

NOTE: We are in the process of applying for Continuing Education Units for these webinars.
