# Welcome!

## **At the end of this lecture series the attendee will be able to:**

- Enhance proficiency at the work bench:
  - Standardization of definitions of placental lesions and sampling
  - Why sampling technique matters in cases of retained placenta/manual extraction
  - Bridging the gap between clinical decisions behind the surgical technique and gross specimen
  - Understand the rationale for all the upfront special stains/IHC in thoracic cases
- Understand Disorders of Sex Development and the inherent controversies behind gender identity in this rare population
- Discuss pulmonary pathology commonly encountered in the Western PA region
- Expand knowledge base: Challenge conventional diagnostics by reviewing cases with unusual presentations and diagnostic findings

## Target Audience
