GENERAL INFORMATION

<u>Course Overview</u>

This 4-day course teaches the surgical techniques and anatomy for endoscopic endonasal surgery of the ventral skull base. Experts on the subject will present the anatomical and technical aspects of this procedure along with the risks, benefits and outcomes.

The course features an interactive live surgery demonstration using indocyanine green fluorescence endoscopy, fresh anatomical specimen dissection, lectures and panel discussions, 3D anatomy lectures, and case presentations. Participants will have an opportunity to enhance their knowledge and skills regarding endoscopic surgery of the ventral skull base.

Learning Objectives

Following completion of this course, participants should be able to:

- Describe the anatomic relationships between the ventral skull base, paranasal sinuses and orbit.
- Understand the indications, benefits and risks associated with endoscopic endonasal skull base surgery.
- Utilize endoscopic techniques to approach tumors in the anterior, middle and cranial fossae.

Target Audience

This course is designed for skull base teams (neurosurgeons, otolaryngologists, head and neck surgeons) and senior level residents who wish to learn and practice the technical skills needed to perform comprehensive endoscopic endonasal surgery of the ventral skull base.

Location (unless otherwise noted)

Lecture Room:	UPMC Eye & Ear Institute/Biomedical Science Tower South 203 Lothrop Street, 1 st Floor, Room S-120
Lab:	University of Pittsburgh School of Medicine Anatomy Lab Scaife Hall, 3550 Terrace Street, 3 rd Floor, Room 360

Audio/Video Recording and Photography Policy

The use of audio/video recording or photographic devices is **NOT** permitted at any time in the lecture room, anatomy lab or hospital.

Continuing Medical Education Credit

In support of improving patient care, the University of Pittsburgh is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

The University of Pittsburgh designates this live activity for a maximum of 31.25 AMA PRA Category 1 Credits[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Other health care professionals will receive a certificate of attendance confirming the number of contact hours commensurate with the extent of participation in this activity.

To receive CME credit:

The UPMC Center for Continuing Education in the Health Sciences (CCEHS) Continuing Education Learning Portal (<u>https://cce.upmc.com</u>) is used to claim and track your continuing education credits. Certificates will be available to download and stored for future reference.

If you are a new user, click <u>Register</u> (upper right corner) to create an account. The email address you listed on your registration form should be the same email you use when creating your account. If you choose a different email, please notify the UPMC Center for Continuing Education by emailing <u>ccehs support@upmc.edu</u> or <u>https://cce.upmc.com/contact-us</u> to update your records. Once your account has been created, return to login, complete the course evaluation and claim credit on the <u>CCEHS Learning Portal</u>, <u>https://cce.upmc.com</u>. The activity is accessible in your <u>Pending Activities</u>. Please allow up to 2 days before accessing.

Questions or problems? Please contact the UPMC Center for Continuing Education by emailing <u>ccehs_support@upmc.edu</u> or <u>https://cce.upmc.com/contact-us</u>

COVID~19 Policies

All course attendees must adhere to the following:

- Become familiar with, and comply with, all federal state, and local laws, orders, directives, and guidelines related to COVID-19 including CDC guidance on COVID-19; comply with any UPMC instructions related to health and safety measures, including masking and social distancing.
- Monitor their health and leave the course (or otherwise not attend) if experiencing COVID-19 symptoms, such as fever or chills, cough, shortness of breath or difficulty breathing, muscle or body aches, new loss of taste or smell, or if they have a confirmed or suspected case of COVID-19.

Wi-Fi Access

Complimentary Wi-Fi is available. How to connect:

- 1. View available wireless networks.
- 2. Connect to "upmc-guest"
- 3. Open your Web Browser, begin surfing!

Disclaimer Statement

The information presented at this program represents the views and opinions of the individual presenters, and does not constitute the opinion or endorsement of, or promotion by, the UPMC Center for Continuing Education in the Health Sciences, UPMC / University of Pittsburgh Medical Center or Affiliates and University of Pittsburgh School of Medicine. Reasonable efforts have been taken intending for educational subject matter to be presented in a balanced, unbiased fashion and in compliance with regulatory requirements. However, each program attendee must always use his/her own personal and professional judgment when considering further application of this information, particularly as it may relate to patient diagnostic or treatment decisions including, without limitation, FDA-approved uses and any off-label uses.

ACKNOWLEDGEMENT OF SUPPORT

GUEST FACULTY

Shaan M. Raza, MD

Associate Professor of Neurosurgery and Head and Neck Surgery Neurosurgical Director, Multidisciplinary Skull Base and Pituitary Program The University of Texas MD Anderson Cancer Center Houston, Texas

Shirley Y. Su, MBBS

Associate Professor of Head and Neck Surgery and Neurosurgery The University of Texas MD Anderson Cancer Center Houston, Texas

UPMC FACULTY

Paul A. Gardner, MD *Professor of Neurological Surgery and Otolaryngology Co-Director, Center for Cranial Base Surgery*

Michael M. McDowell, MD Assistant Professor of Neurological Surgery

Carl H. Snyderman, MD, MBA Professor of Otolaryngology and Neurological Surgery Co-Director, Center for Cranial Base Surgery S. Tonya Stefko, MD

Professor of Ophthalmology, Otolaryngology and Neurological Surgery

Eric W. Wang, MD *Professor of Otolaryngology, Neurological Surgery and Ophthalmology Director of Education, Center for Cranial Base Surgery*

Georgios A. Zenonos, MD Assistant Professor of Neurological Surgery Associate Director, Center for Cranial Base Surgery

UPMC LAB ASSISTANTS

GROUP A

Andrey Filimonov, MD, PharmD Fellow, Center for Cranial Base Surgery Department of Otolaryngology

M. Salman Ali, MD *Fellow, Center for Cranial Base Surgery* Department of Neurological Surgery

GROUP B:

Lauren North, MD Fellow, Center for Cranial Base Surgery Department of Otolaryngology

Hussam Abou-Al-Shaar, MD Intraresidency Fellow, Center for Cranial Base Surgery Department of Neurological Surgery

Hanna Algattas, MD Intraresidency Fellow, Center for Cranial Base Surgery Department of Neurological Surgery

WEDNESDAY, DECEMBER 7, 2022

- 7:15 AM REGISTRATION & BREAKFAST
- 7:30 AM Let's Get Started: Classification and Training (including lab training) Carl Snyderman, MD, MBA
- 7:55 AM Navigating the Nose and Sinuses: Getting to the Skull Base in 3D Eric Wang, MD
- 8:20 AM It All Starts at the Sella: Endoscopic Pituitary Surgery Paul Gardner, MD
- 9:05 AM ALL Transfer from Lecture Room to Lab
- 9:15 AM Prosection for Lab Session 1 Pituitary Surgery Shaan Raza, MD and Shirley Su, MBBS
- 10:15 AM Lab Session 1

<u>Group A:</u>	<u>Group B:</u>
Anatomical Dissection	Prosection for Lab Sessions 3&4: Sagittal Plane
 Intranasal Landmarks Middle Turbinates Septal Mucosal Flap Sphenoidotomy Sella Posterior Ethmoidectomy Suprasellar/Transplanum Approach 	 After Prosection, transfer from Lab to Lecture Room for: 3D Surgical Anatomy Lectures Georgios Zenonos, MD Anterior Skull Base Sinonasal, Sellar and Parasellar Regions

12:30 PM GROUP A: Transfer from Lab to Lecture Room

12:45 PM LUNCH & LECTURE Tools for Success: Equipment, Instruments and Set-Up for Endonasal Surgery Eric Wang, MD
1:15 PM Plumbing Problems Big and Small: Reconstruction of Skull Base Defects Carl Snyderman, MD, MBA
1:50 PM Up and Away: Transtuberculum and Transplanum Approaches Paul Gardner, MD

WEDNESDAY, DECEMBER 7, 2022 (CONTINUED)

2:50 PM PANEL DISCUSSION: Behind the Scenes – Perioperative Care Moderator: Eric Wang, MD Panelists: All Faculty

3:15 PM GROUP B: Transfer from Lecture Room to Lab

3:30 PM Lab Session 2

Group A:	<u>Group B:</u>

After Lectures, transfer from Lecture Room to Lab for: Prosection for Lab Sessions 3&4: Sagittal Plane	 Sphenoidotomy Sella Posterior Ethmoidectomy Suprasellar/Transplanum Approach

5:45 PM ADJOURNMENT

EVENING AT LEISURE (For complete information about events, shopping areas, or restaurants in or near Oakland, please feel free to visit the following websites (<u>http://www.pittsburghmagazine.com</u> or <u>http://www.visitpittsburgh.com/</u>) or feel free to ask us for recommendations!)

THURSDAY, DECEMBER 8, 2022

7:00 AM BREAKFAST

- 7:15 AM The New Workhorses: Transclival, Transodontoid Approaches Paul Gardner, MD
- 8:00 AM Case Presentations & Live Surgery Paul Gardner, MD, Carl Snyderman, MD, MBA, Eric Wang, MD, and Georgios Zenonos, MD Moderators Shaan Raza, MD and Shirley Su, MBBS
- 12:00 PM LUNCH
- 1:00 PM ALL Transfer from Lecture Room to Lab
- 1:15 PM Lab Session 3

<u>Group A:</u>	Group B:
Prosection for Lab Sessions 5 & 6: Sagittal Plane	 Anatomical Dissection Anterior Ethmoidectomy
After Prosection, transfer from Lab to Lecture Room for: Challenges and Considerations of Pediatric Endonasal Surgery Michael McDowell, MD	 Medial Orbital Decompression Optic Nerve Decompression Ethmoid Artery Ligation Frontal Sinusotomy (Draf 3 Procedure) Craniofacial Resection

- 3:00 PM GROUP B: Transfer from Lab to Lecture Room
- 3:15 PM Craniofacial Resection for Sinonasal Malignancy and Meningioma Carl Snyderman, MD, MBA
- 3:45 PM GROUP A: Transfer from Lecture Room to Lab

GROUP B: Lecture – Challenges and Considerations of Pediatric Endonasal Surgery Michael McDowell, MD

THURSDAY, DECEMBER 8, 2022 (CONTINUED)

4:00 PM Lab Session 4

<u>Group A:</u>	<u>Group B:</u>
 Anatomical Dissection Anterior Ethmoidectomy Medial Orbital Decompression 	After Lecture, transfer from Lecture Room to Lab for:
 Optic Nerve Decompression Ethmoid Artery Ligation Frontal Sinusotomy (Draf 3 Procedure) Craniofacial Resection 	Prosection for Lab Sessions 5 & 6: Sagittal Plane

5:45 PM AFTERNOON PROGRAM ADJOURNMENT

EVENING PROGRAM (Registrants Only Please)

LOCATION:	Wyndham Pittsburgh University Center	
	Schenley Ballrooms I-IV	
	100 Lytton Avenue	
	Pittsburgh (Oakland) PA 15213	

- 6:30 PM Cocktail Reception
- 7:00 PM Dinner & Guest Faculty Lectures
 - 7:30 PM Advances in the Management of Sinonasal Malignancies Shirley Su, MBBS
 - 8:00 PM Multidisciplinary Management of Skull Base Chondrosarcomas Shaan Raza, MD
- 8:45 PM ADJOURNMENT

FRIDAY, DECEMBER 9, 2022

** NOTE: LECTURE ROOM CHANGE TO BST S-100 **

- 8:00 AM BREAKFAST
- 8:15 AM Transpterygoid Approach: Gateway to the Coronal Plane Eric Wang, MD
- 8:45 AM Group Photo
- 8:55 AM GROUP A: Transfer from Lecture Room to Lab

GROUP B: 3D Surgical Anatomy Lecture – Posterior Skull Base Georgios Zenonos, MD

9:10 AM Lab Session 5

Group A:	<u>Group B:</u>
 Anatomical Dissection Palatosphenoidal Artery and Vidian Nerve Identification Pituitary Transposition Transclival Approach (Extradural/Intradural) Transodontoid Approach Medial Transpetrous Approach Cavernous Sinus Approaches 	After Lecture, transfer from Lecture Room to Lab for: Prosection: Orbital Approaches S. Tonya Stefko, MD Prosection for Lab Sessions 7 & 8: Coronal Plane Equipment Demonstrations

- 12:10 PM ALL TRANSFER FROM LAB TO LECTURE ROOM
- 12:25 PM LUNCH & LECTURE Outside the Box: Coronal Plane Approaches Paul Gardner, MD
- 1:30 PM GROUP A: 3D Surgical Anatomy Lecture Posterior Skull Base Georgios Zenonos, MD

GROUP B: Transfer from Lecture Room to Lab

FRIDAY, DECEMBER 9, 2022 (CONTINUED)

1:45 PM Lab Session 6

Group A:	oup B:
After Lecture, transfer from Lecture Room to Lab for:An.Prosection: Orbital Approaches S. Tonya Stefko, MDFrosection for Lab Sessions 7 & 8: Coronal Plane Equipment Demonstrations	 atomical Dissection Palatosphenoidal Artery and Vidian Nerve Identification Pituitary Transposition Transclival Approach (Extradural/Intradural) Transodontoid Approach Medial Transpetrous Approach Cavernous Sinus Approaches

4:45 PM ADJOURNMENT

- 6:10 PM Transportation Departs Wyndham Pittsburgh University Center Hotel for Course Banquet
- 6:30 PM Course Banquet (Registrants Only Please)
- LOCATION: Monterey Bay Fish Grotto ~ Skyline Room 1411 Grandview Avenue Pittsburgh (Mt. Washington) PA 15211 <u>https://www.montereybayfishgrotto.com/</u>
- 9:30 PM Transportation Departs Course Banquet for Wyndham Pittsburgh University Center Hotel

SATURDAY, DECEMBER 10, 2022

- 7:45 AM BREAKFAST
- 8:00 AM PANEL DISCUSSION: Putting it all Together: Case-Based Discussion and Q&A ** Attendees are encouraged to bring cases for discussion ** Moderators: Shaan Raza, MD and Shirley Su, MBBS Panelists: All Faculty
- 8:30 AM GROUP A: Transfer from Lecture Room to Lab
 - GROUP B: 3D Surgical Anatomy Lecture Cavernous Sinus and Middle Fossa Georgios Zenonos, MD

8:45 AM Lab Session 7

Group A:	<u>Group B:</u>
Anatomical DissectionAntrostomy	After Lecture, transfer from Lecture Room to Lab for:
 Sphenopalatine Artery Ligation Middle Cranial Fossa Approaches: Transpterygoid 	Prosection: Alternative Reconstructive Flaps: Pericranial Flap, Inferior Turbinate Wall Flap
Cavernous SinusMeckel's CaveInfratemporal Skull Base	Equipment Demonstrations

11:00 AM ALL TRANSFER FROM LAB TO LECTURE ROOM

- 11:15 AM LUNCH & LECTURE Code Red: Carotid Artery Injury Paul Gardner, MD
- 12:15 PM GROUP A: 3D Surgical Anatomy Lecture Cavernous Sinus and Middle Fossa Georgios Zenonos, MD

GROUP B: Transfer from Lecture Room to Lab

SATURDAY, DECEMBER 10, 2022 (CONTINUED)

12:30 PM Lab Session 8

Group A:	Group B:
After Lecture, transfer from Lecture Room to Lab for:	 Anatomical Dissection Antrostomy
Prosection: Alternative Reconstructive Flaps: Pericranial Flap, Inferior Turbinate Wall Flap	 Sphenopalatine Artery Ligation Middle Cranial Fossa Approaches: Transpterygoid
Equipment Demonstrations	 Cavernous Sinus Meckel's Cave Infratemporal Skull Base
2:15 PM Disaster Plan: ICA Injury Simulation Exercise Paul Gardner, MD	

2:30 PM COURSE ADJOURNMENT

Wednesday, December 7, 2022: Lab Sessions 1 & 2

- 1. Intraoperative navigational device. Familiarize yourself with the function of the image guidance system.
- 2. Identify the following **intranasal landmarks**: inferior turbinate, middle turbinate, superior turbinate, middle meatus, hiatus semilunaris, uncinate process, bulla ethmoidalis, sphenoid rostrum, sphenoid ostium, olfactory sulcus.
- 3. Resect the **middle turbinates**.
- 4. Elevate a **septal mucosal flap** on one side. It should be pedicled on the ipsilateral posterior nasal artery. Displace the flap into the nasopharynx during the other procedures.
- 5. Endonasal approaches for pituitary surgery. Transect the posterior nasal septum and expose the sphenoid rostrum. Remove rostrum and open sphenoid air cells. Enlarge the opening maximally in all directions. Resect the posterior edge of the nasal septum to enhance bilateral exposure. Identify sphenoid sinus landmarks: planum sphenoidale, optic canal, lateral optic-carotid recess, carotid canal, medial optic-carotid recess, sella, clival recess. Remove sphenoid septations and note relationship to carotid canal.
- 6. **Pituitary**. Open the sella to the margins of the cavernous sinus in all directions. Remove sphenoid rostrum inferiorly and note how it improves access to the sella.
- 7. **Posterior ethmoidectomy**. Skeletonize the posterior medial orbit and ethmoid roof by removing the posterior ethmoid air cells. Identify the increased visualization and exposure to the sphenoid planum.
- 8. **Suprasellar/transplanum approach**. Thin and remove the bone of the planum sphenoidale. Thin and remove the bone of the "tuberculum strut" bilaterally. Open the suprasellar dura and identify the optic chiasm, infundibulum, and ICA. Identify the superior hypophyseal artery.

Thursday, December 8, 2022: Lab Sessions 3 & 4

- 1. Anterior ethmoidectomy. Open the bulla ethmoidalis and remove anterior ethmoid air cells in an anterior to posterior direction. Identify the lamina papyracea. Expose the nasofrontal recess and identify the anterior ethmoid artery. Repeat the ethmoidectomy on the opposite side.
- 2. **Medial orbital decompression**. Make an opening in the lamina papyracea and remove the medial orbital wall from the fovea ethmoidalis superiorly to the orbital floor and as far posteriorly as the anterior wall of the sphenoid sinus.
- 3. **Optic nerve decompression**. Decompress the orbital apex and follow the optic canal posteriorly. Use the drill to thin the bone over the optic nerve without exposing the carotid artery.
- 4. **Anterior and posterior ethmoid artery ligation**. Elevate the periorbita along the skull base and identify the anterior and posterior ethmoid arteries.
- 5. **Frontal sinusotomy (Draf procedure).** Perform a Draf Type 3 procedure. Resect the anterior nasal septum superiorly, anterior to the middle turbinates. Remove the floor of the frontal sinuses across the midline and anterior to the crista galli.
- 6. Anterior craniofacial resection. Resect the superior attachment of the nasal septum from the crista galli to the sphenoid. Resect attachments of middle turbinates. Thin and remove bone of anterior cranial base from ethmoid roof laterally and to planum sphenoidale posteriorly. Drill out crista galli. Incise dura bilaterally and then transect falx attachment anteriorly. Reflect dura posteriorly and identify olfactory bulbs. Elevate olfactory tracts and transect nerves posteriorly. Identify the interhemispheric fissures, frontopolar vessels, and anterior communicating artery.

Friday, December 9, 2022: Lab Sessions 5 & 6

- 1. **Palatosphenoidal artery and vidian nerve identification**. At the floor of the sphenoid sinus, identify the palatosphenoidal artery as it exits the pterygopalatine fossa and enters the nasopharynx. The vertical process of the palatine bone covering the palatosphenoidal artery should be removed. At this level, dissect laterally until you identify the vidian canal.
- 2. Pituitary transposition. Lift up the pituitary gland and drill out the posterior clinoids.
- 3. **Transclival approach (extradural).** Remove the bone of the clivus to expose the dura from the sella to the lower clivus.
- 4. **Transclival approach (intradural).** Open the dura to expose the vertebral and basilar arteries.
- 5. Transodontoid approach. Remove the soft tissues between the Eustachian tubes to the level of the soft palate. Remove cortical bone of the clivus from the sphenoid floor to the foramen magnum. Remove the lower edge of the clivus (foramen magnum). Expose the ring of C1 and remove the central portion. Drill out the dens down to the level of the body of C2.
- 6. **Reconstruction with mucosal flap**. Position mucosal flap in different areas of the skull base to see limits of reach and surface area of reconstruction.
- 7. **Medial petrous apex**. Drill the bone medial and deep to the ICA at the level of the clival recess. Open air cells of the petrous apex. Identify the course of the 6th cranial nerve.

Saturday, December 10, 2022: Lab Sessions 7 & 8

- 1. Perform a middle meatal **antrostomy** on each side. Remove the uncinate process and enlarge the opening posteriorly and inferiorly. Make sure that you preserve the sphenopalatine arteries.
- 2. **Sphenopalatine artery ligation**. Expose the sphenopalatine and posterior nasal arteries and transect them.
- 3. **Transpterygoid approach**. Transect the sphenopalatine and posterior nasal arteries and open the pterygopalatine space. Elevate the soft tissue to expose the bone of the base of the pterygoids. Identify the vidian artery and nerve.
- 4. Exposure of **petrous ICA**. Drill the bone inferior and medial to the vidian artery and follow the vidian artery to the 2nd genu of the internal carotid artery.
- 5. **Middle cranial fossa approach (suprapetrous).** Identify V2 and drill the bone between V2 and the vidian artery to expose the petrous ICA. Open Meckel's cave lateral to the vertical segment of the ICA.
- 6. Lateral cavernous sinus. Dissect superior to Meckel's cave, lateral to the ICA. Identify the contents of the cavernous sinus.
- 7. Infratemporal skull base. Identify the medial and lateral pterygoid plates inferior to the base of the pterygoids. Follow the lateral pterygoid plate to foramen ovale and identify V3. Resect the medial portion of the Eustachian tube. Open the space between the pterygoid plates and dissect the medial and lateral pterygoid muscles. Follow the Eustachian tube along the skull base and identify the ICA where it enters the skull base.
- 8. **Infrapetrous approach**. Transect V3 and drill the bone along the inferior aspect of the petrous bone to expose the petrous ICA.
- 9. **[your name here]** approach. Discover a new approach to the cranial base and put your name on it.

DISCLOSURES

All individuals in a position to control the content of this education activity have disclosed all financial relationships with any companies whose primary business is producing, marketing, selling, re-selling, or distributing health care products used by or on patients. All of the relevant financial relationships for the individuals listed below have been mitigated.

The following relevant financial relationships were disclosed:

UPMC Global Care: Bridging Patient Care Partnerships Around the World

What is UPMC Global Care?

UPMC firmly believes that patients should have access to quality health care close to home whenever possible. However, medical treatment is not always possible in their home country. To serve medical needs of this nature, UPMC created the Global Care program.

The vision of UPMC Global Care is to offer an innovative service model for international patients that coordinates the care plan before the patient's arrival, provides superior quality care and clinical monitoring while in Pittsburgh, and enables the seamless transition of care, with regular follow-ups after discharge.

Our key differentiator is our total commitment to a serviceoriented approach and our emphasis on an excellent and satisfying experience, not only for the patients and their families, but also for their referring physicians and financial sponsors. Referring physicians can communicate directly with our clinical experts at UPMC regarding treatment plan, discharge instructions, and follow-up care upon their patient's return home.

The Global Care program serves patients through clinical expertise, telemedicine consultations, and health care treatment at a number of facilities in the United States, Ireland, and Italy.

At UPMC, patients can expect:

- Timely responses to inquiries for care, with initial response occurring within one business day
- One point of access for pre-arrival, care delivery, and post-discharge communication
- A single price and single invoice for all services provided.

Why Choose UPMC Global Care?

Patients that receive treatment at UPMC, and their families have unique needs due to cultural barriers and the complexity of the health care system in the United States. To create the most comfortable atmosphere possible, hospitality teams provide a variety of services for each patient, including:

Clinical Care

Clinical care coordinators actively collaborate with physicians and treatment teams to create a comprehensive health plan and monitor the health of patients during treatment. Our physicians establish relationships with referring physicians throughout the care process and in an on-going capacity to ensure safe discharge and continuity of care upon patient's return home.

Patient Hospitality

Multilingual hospitality coordinators serve as cultural liaisons for patients and their families. They provide a single point of contact for each patient and serve to meet all non-medical needs, including communication, travel, housing, dietary, religious, and recreational needs.

Housing and Recreational Services

Hospitality coordinators will review local accommodation options and ensure patients and their families receive safe, convenient housing. For patients requiring extended stay in Pittsburgh, Hospitality coordinators will also assist patients to arrange local cell phone service and open bank accounts. Voted the "Most Livable City in the United States", Pittsburgh has many dining, cultural, shopping, and entertainment options to help patients relax and make the most of their visit.

Patient Financial Coordinators

Patient financial coordinators provide patients with a clear explanation of payment for services at UPMC and assist patients with communicating with insurance companies, sponsoring organizations, or embassy offices.

Visa and Travel Assistance

Medical acceptance letters will be provided for patients and their traveling companions to facilitate their visa application process and in-country interview at their respective US Consulate.

Patient Escort and Navigation

Our multilingual interpreters accompany patients and their companions to their medical appointments to alleviate the stress of having to find their way around the hospital, to facilitate patient registration, and to ensure culturally-sensitive communication with their healthcare provider.

Connect with UPMC Global Care | Find out more about UPMC's programs and services at UPMCGlobalCare.com.

Previously referred to as University of Pittsburgh Medical Center, UPMC is an integrated global health enterprise, and is affiliated with the University of Pittsburgh. To learn more about us, please visit UPMC.com.
