RAD CON RXN - 04/19/24 (8:00am - 11:00am)

The course met the stated objectives.

N = Select Classes (16 responses)

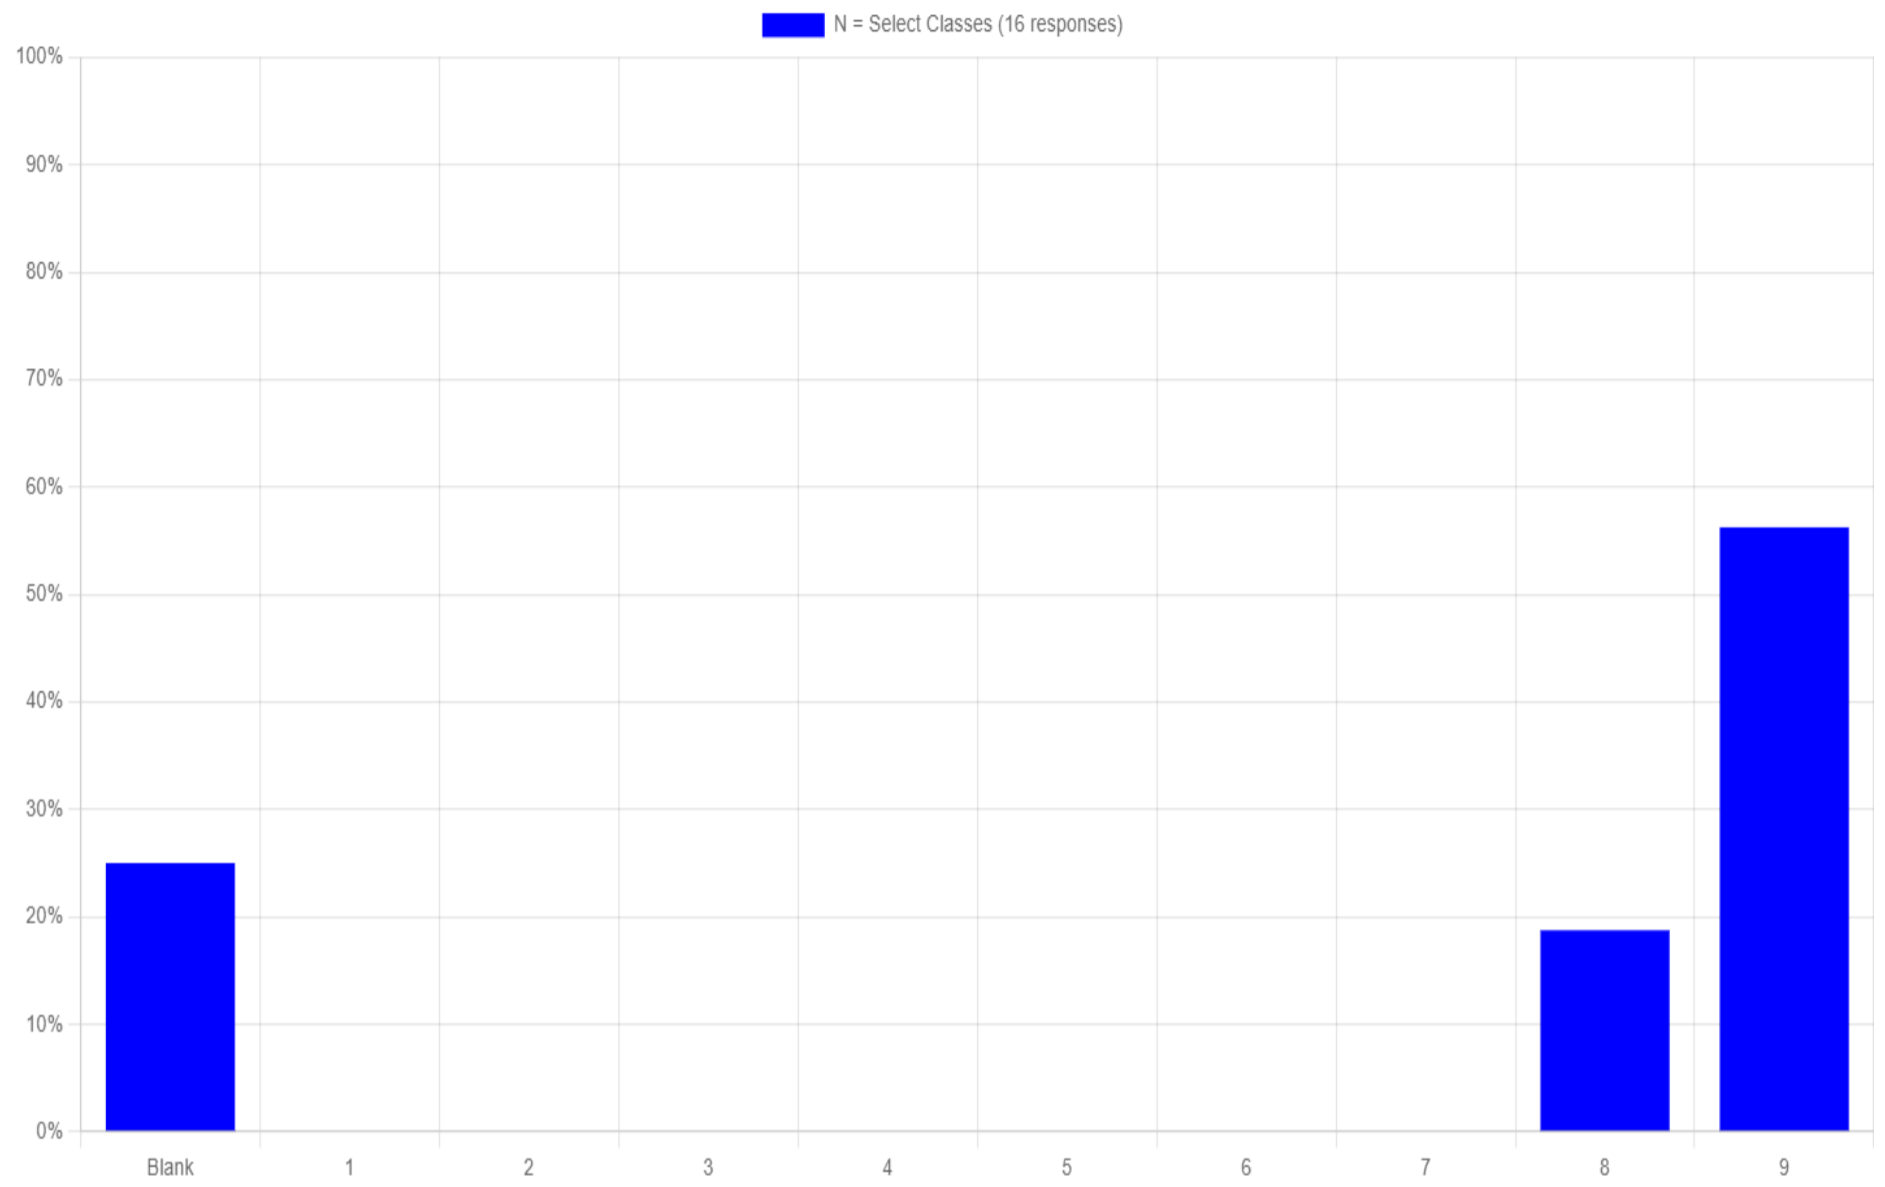

Overall Course Rating.

N = Select Classes (16 responses)
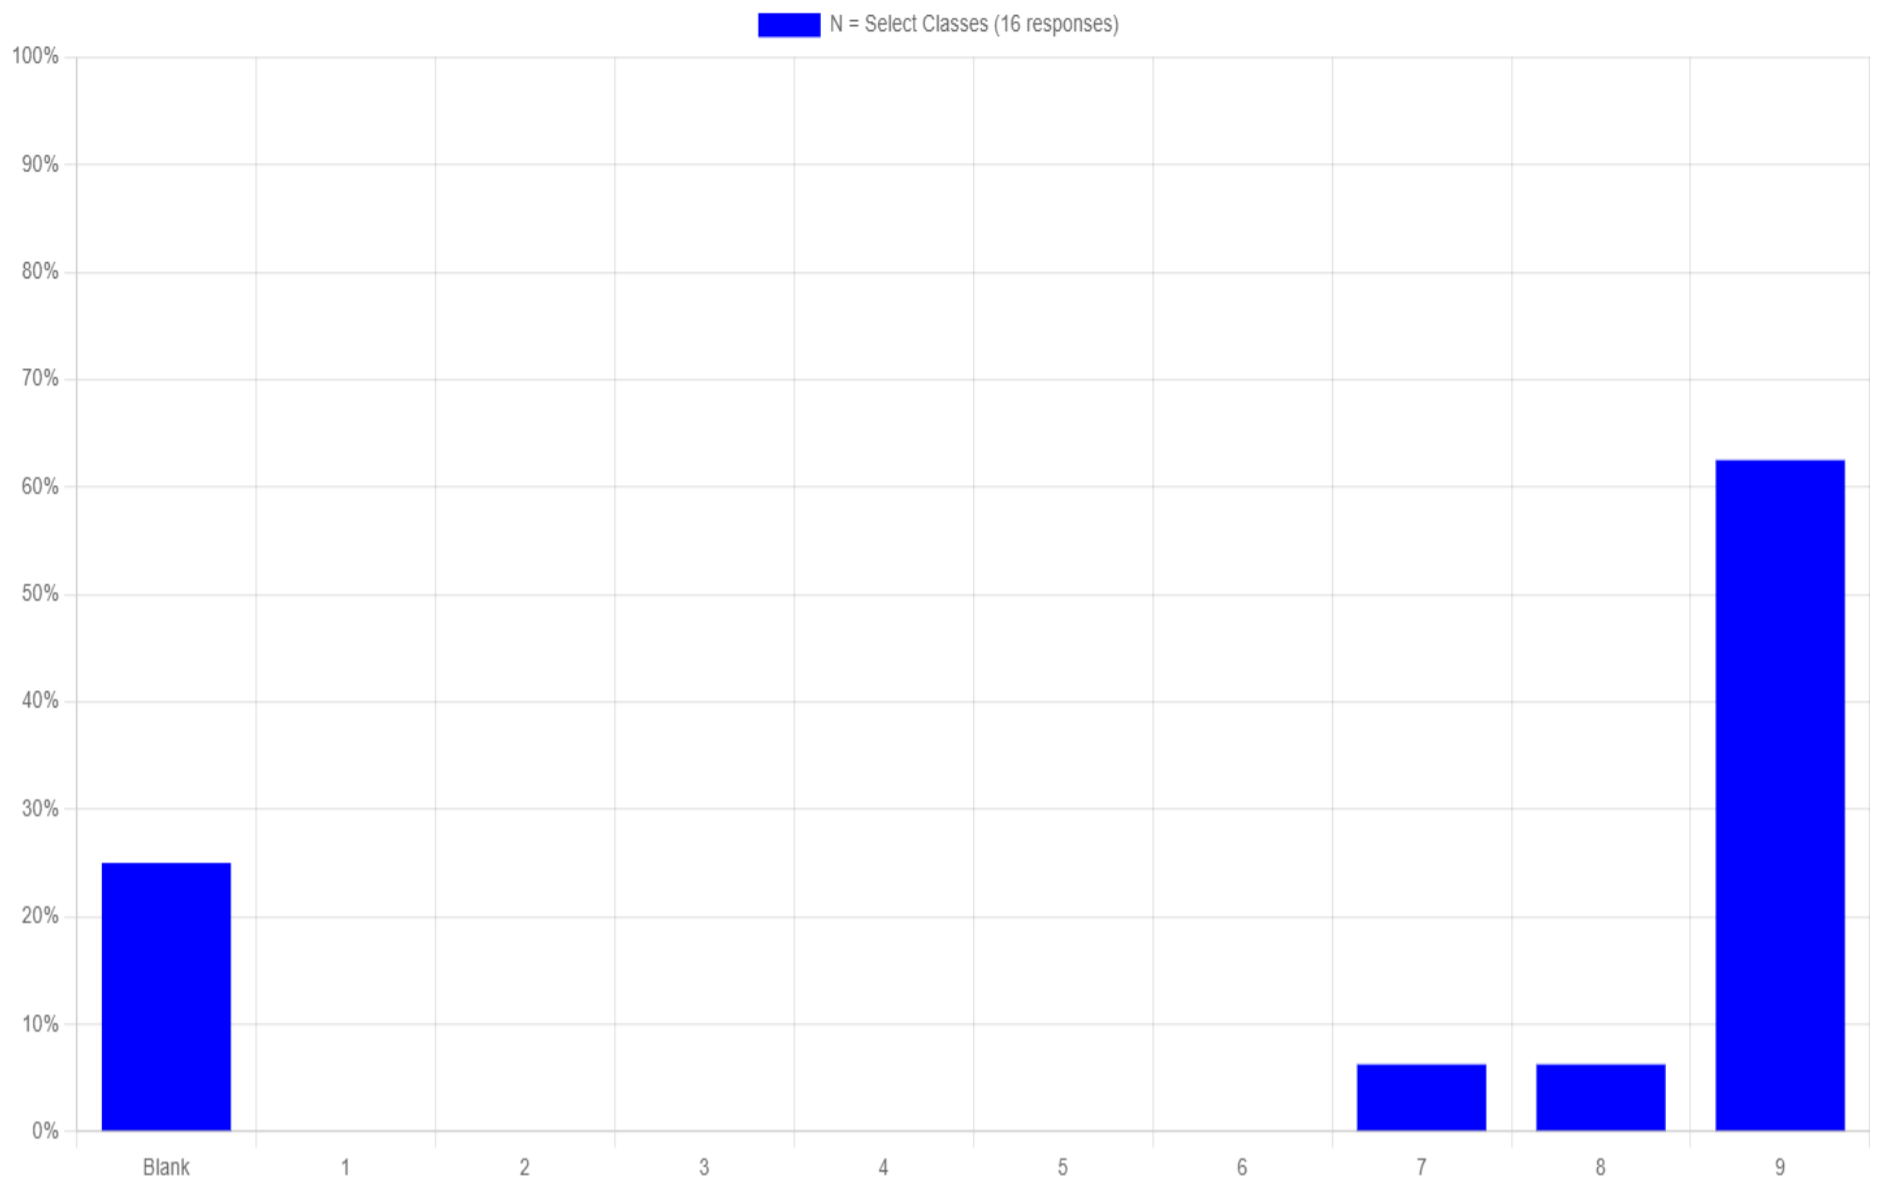

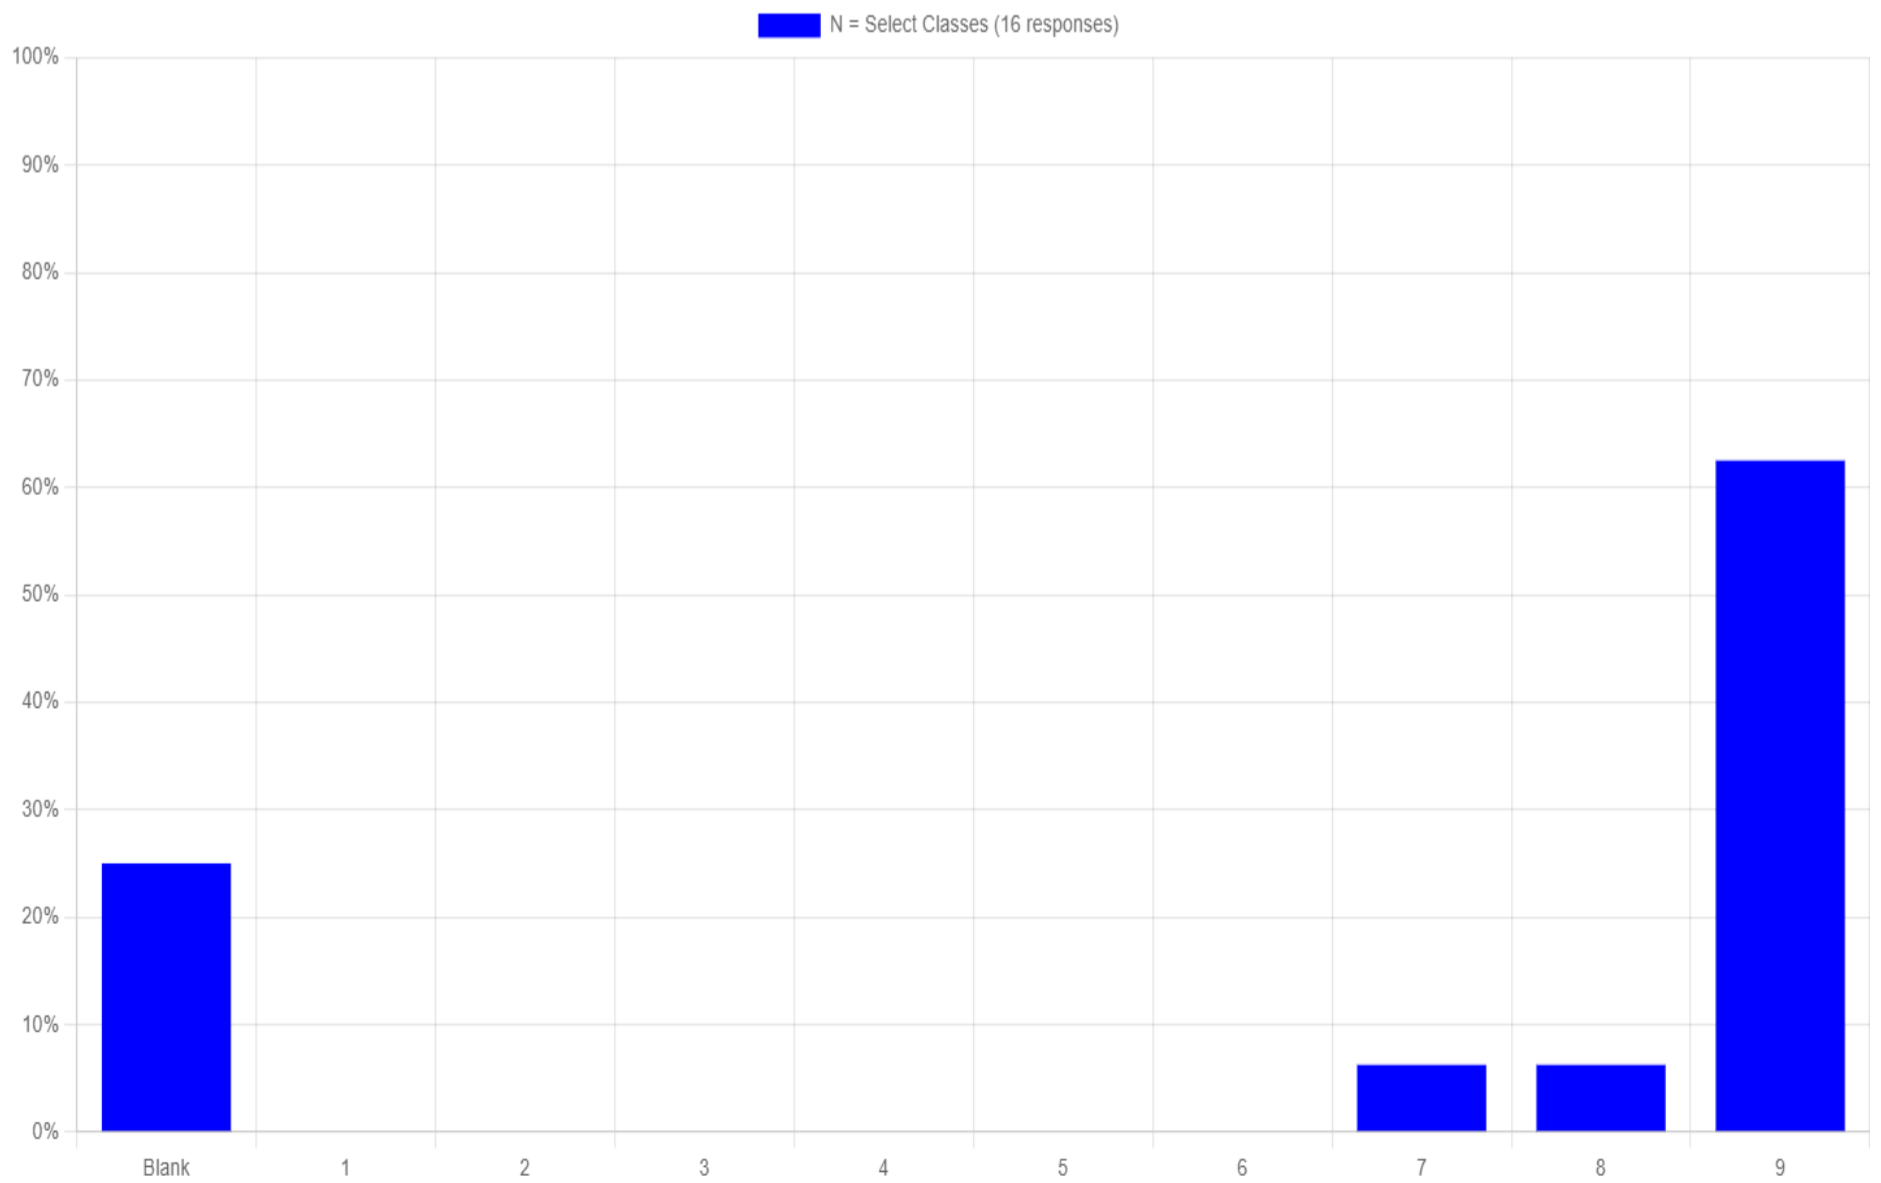

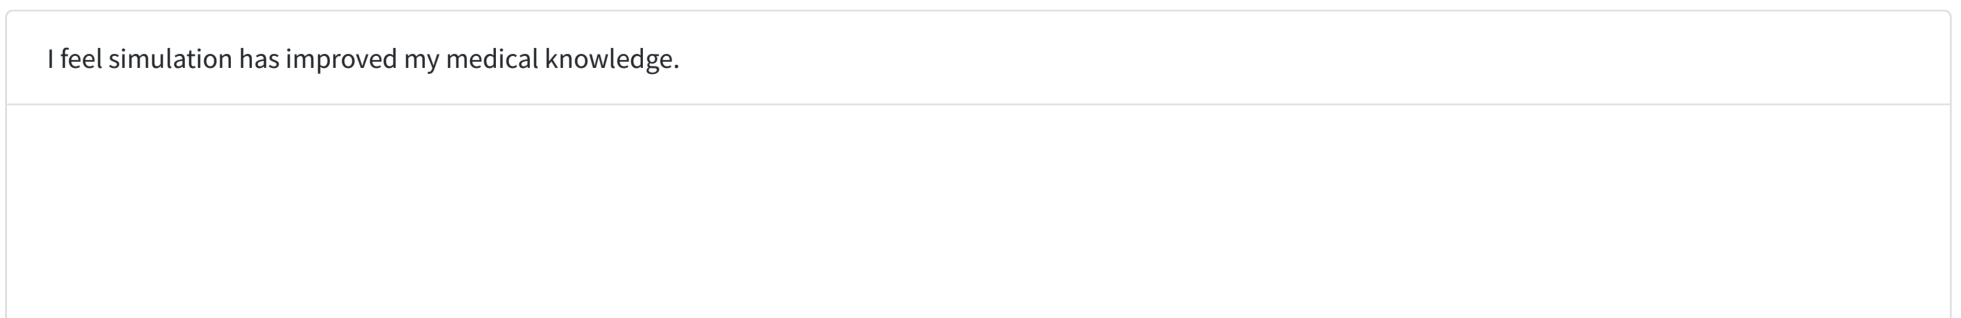

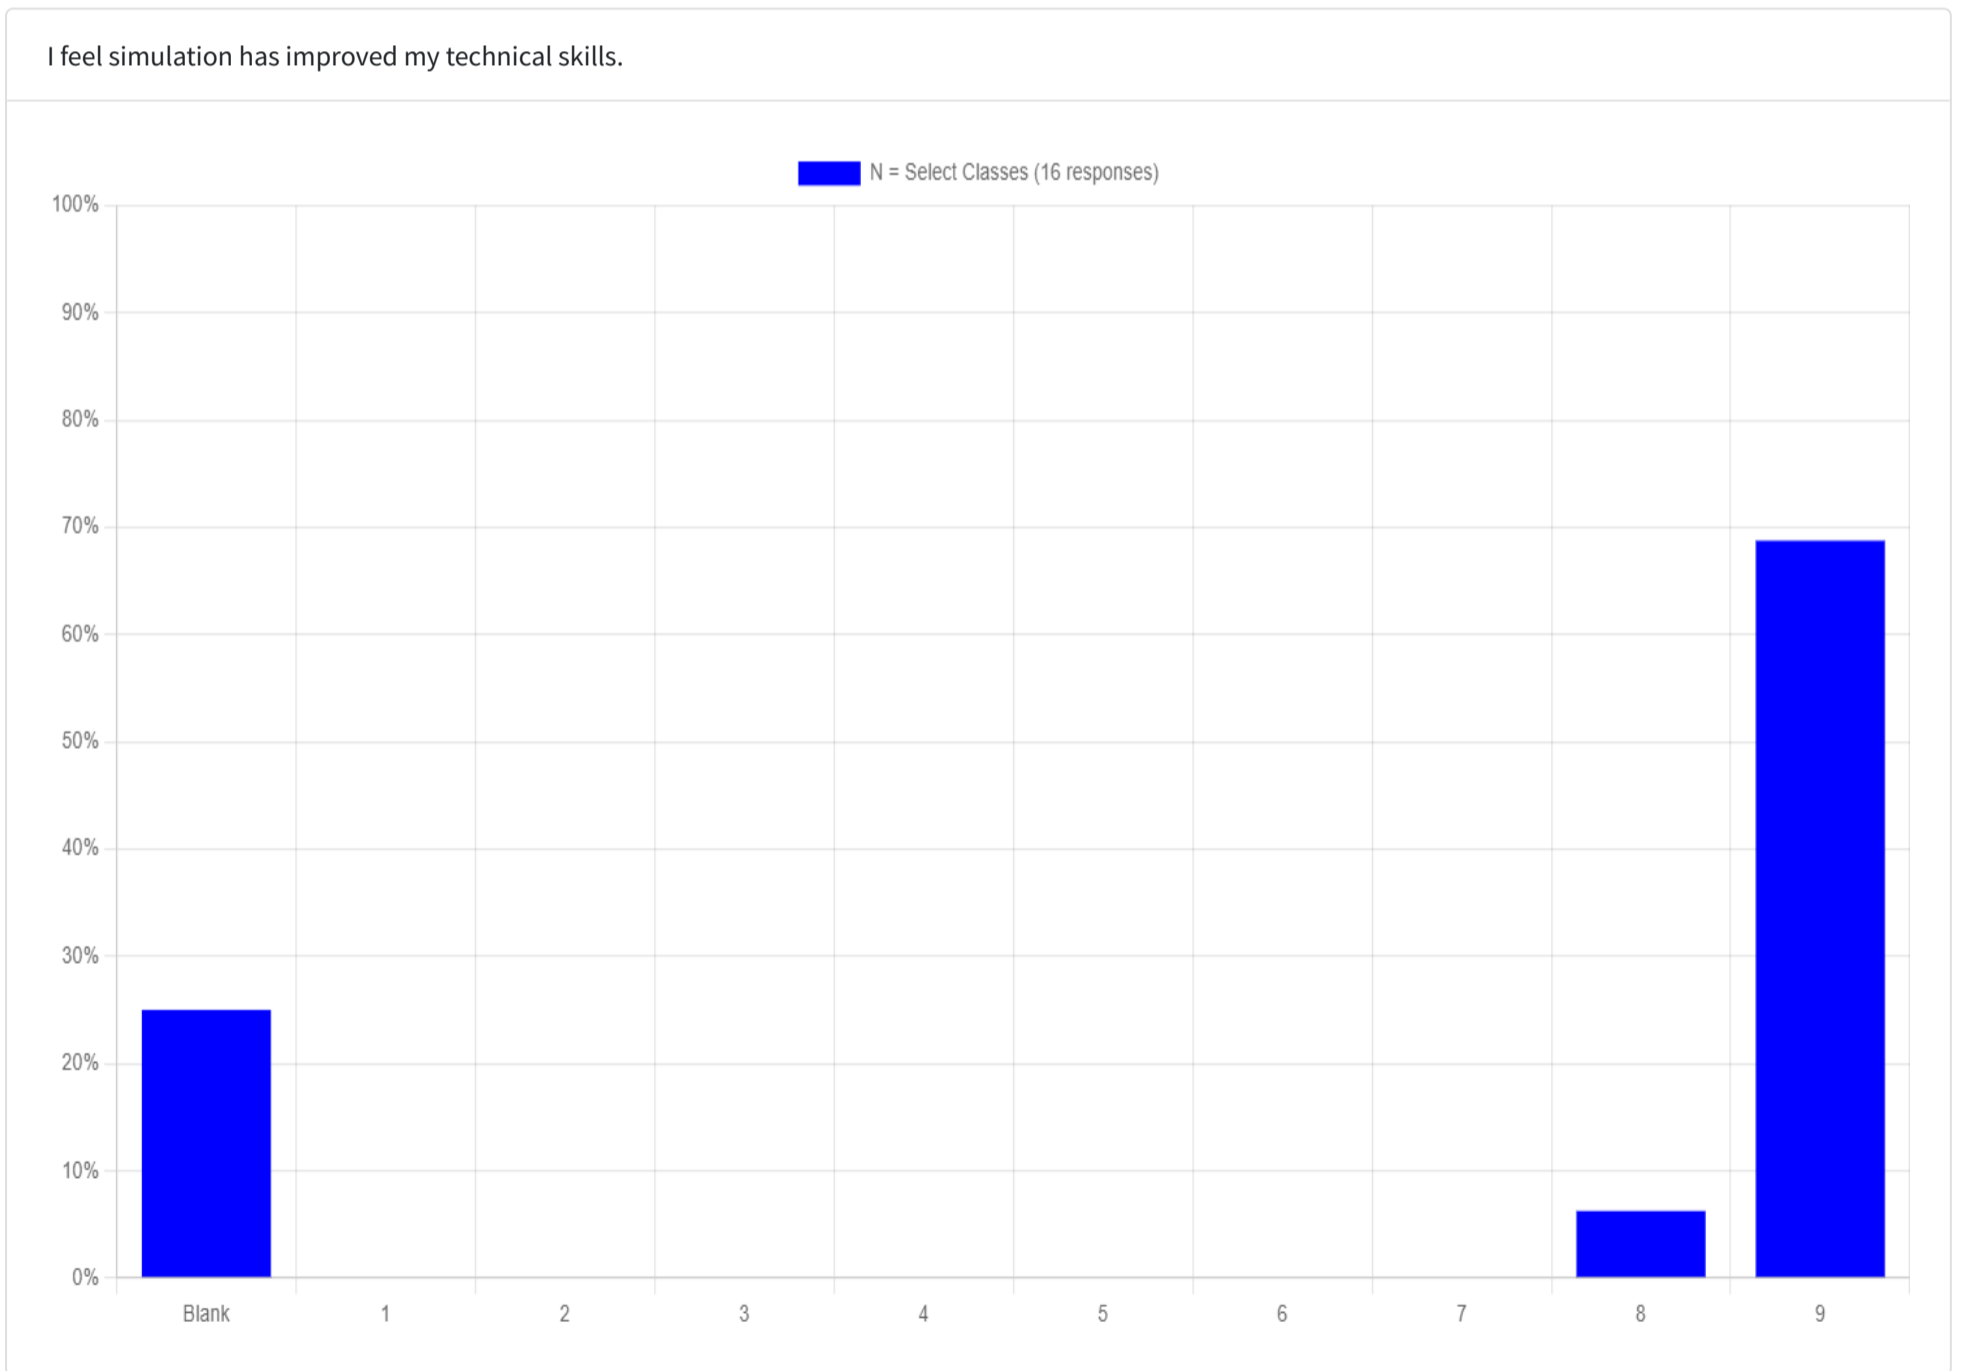

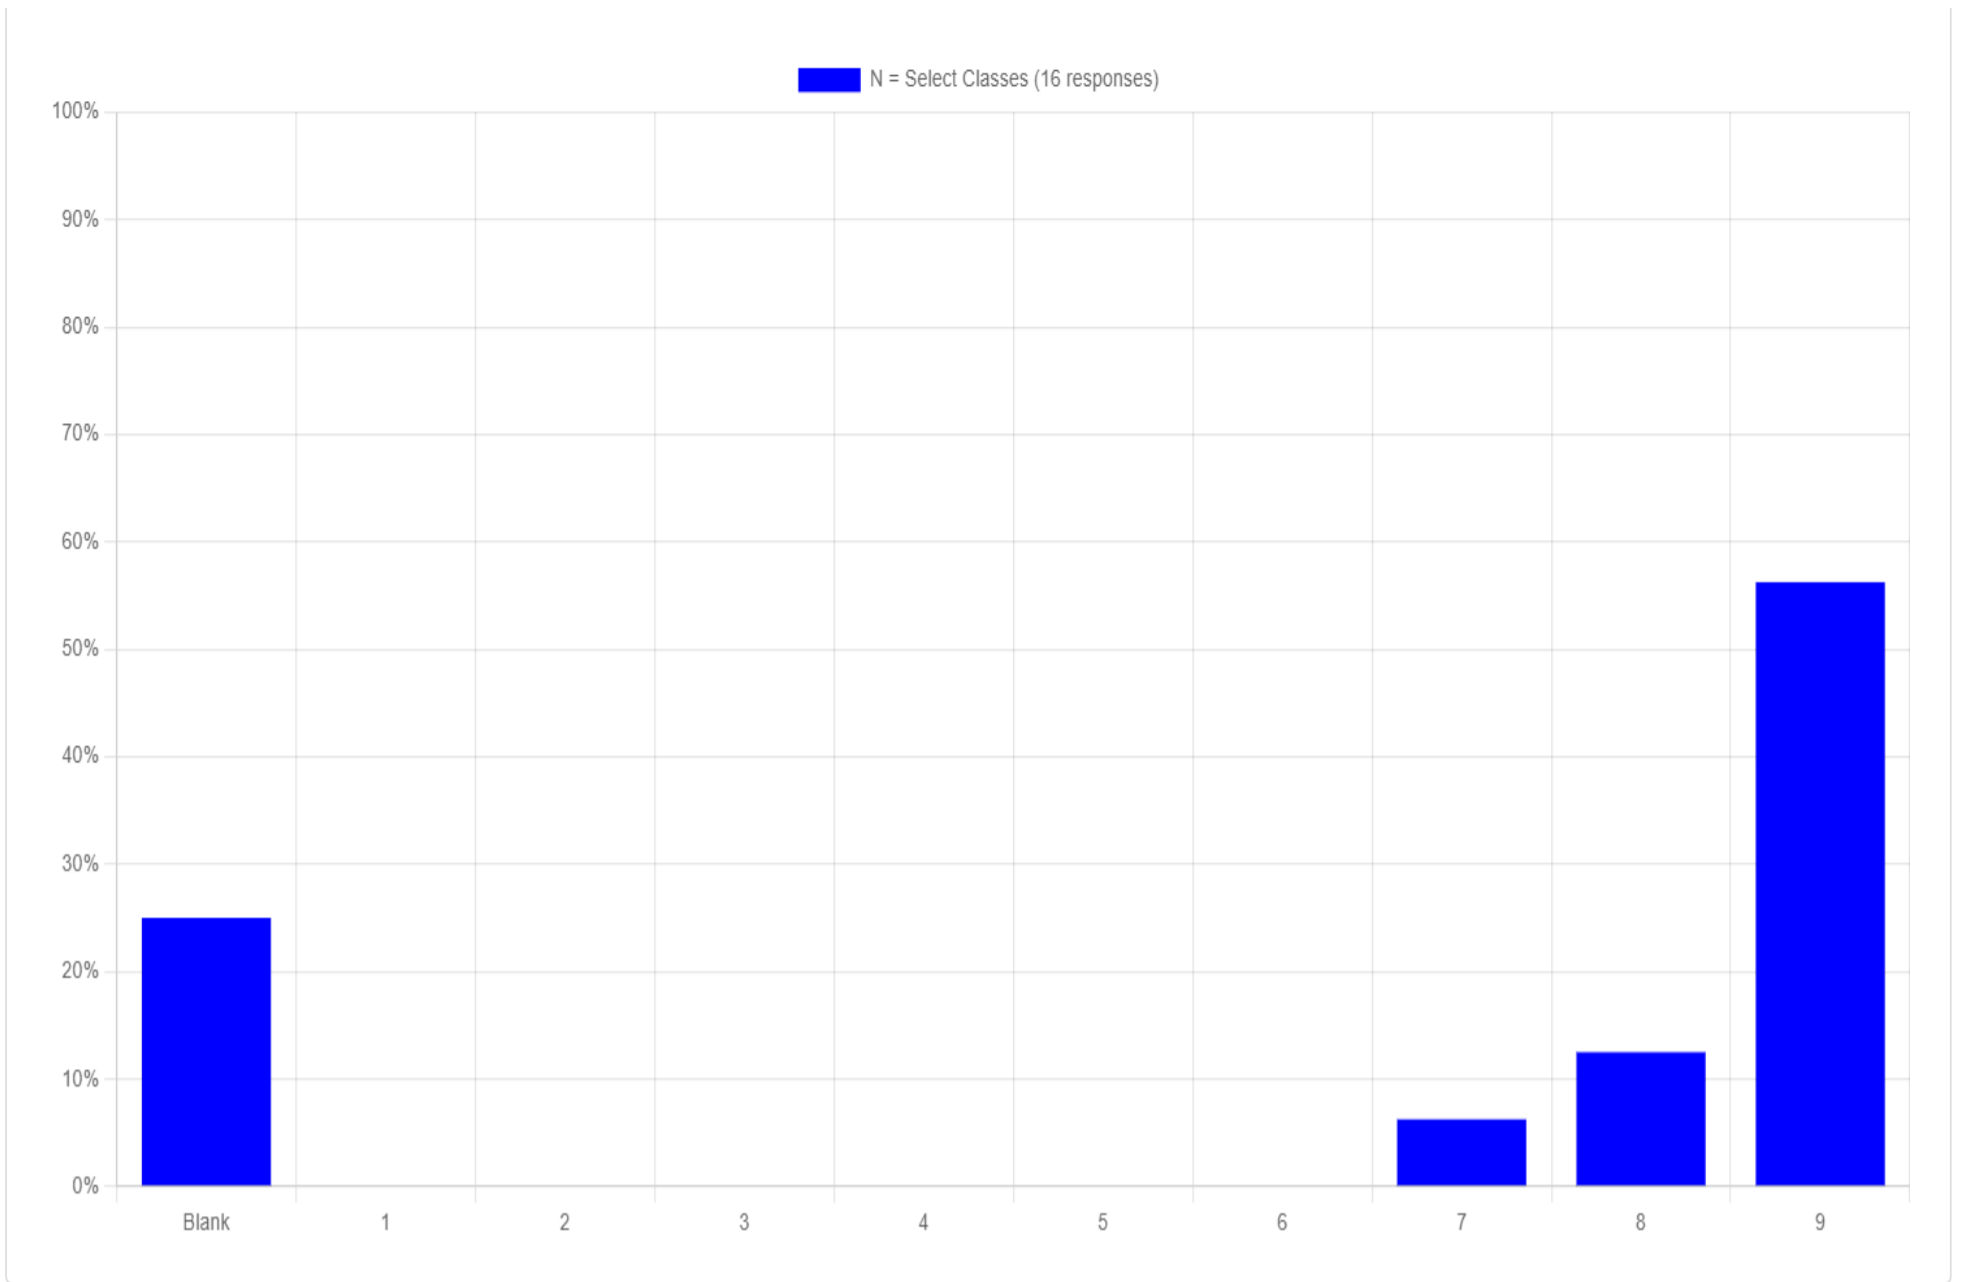

Suggestions for improvement of this course.

Being a tech and required to take this course, an idea of what medicine does what would be helpful. As an ultrasound tech, we do not administer any medication under any circumstances, so a brief description would have been more helpful for the stimulations. However, I learned a lot and feel more comfortable of I ever get put into this situation.
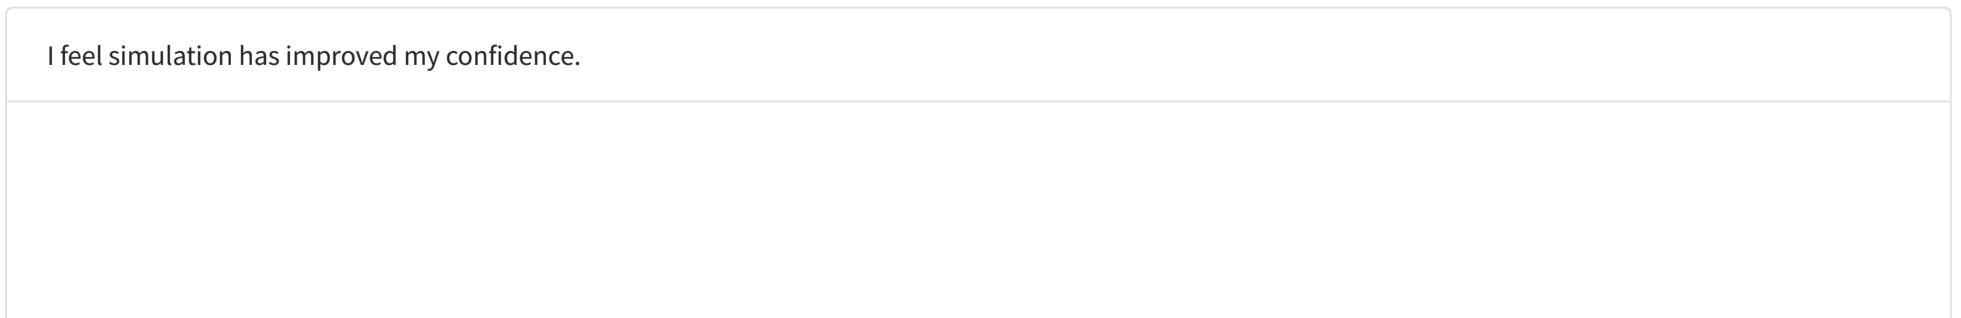

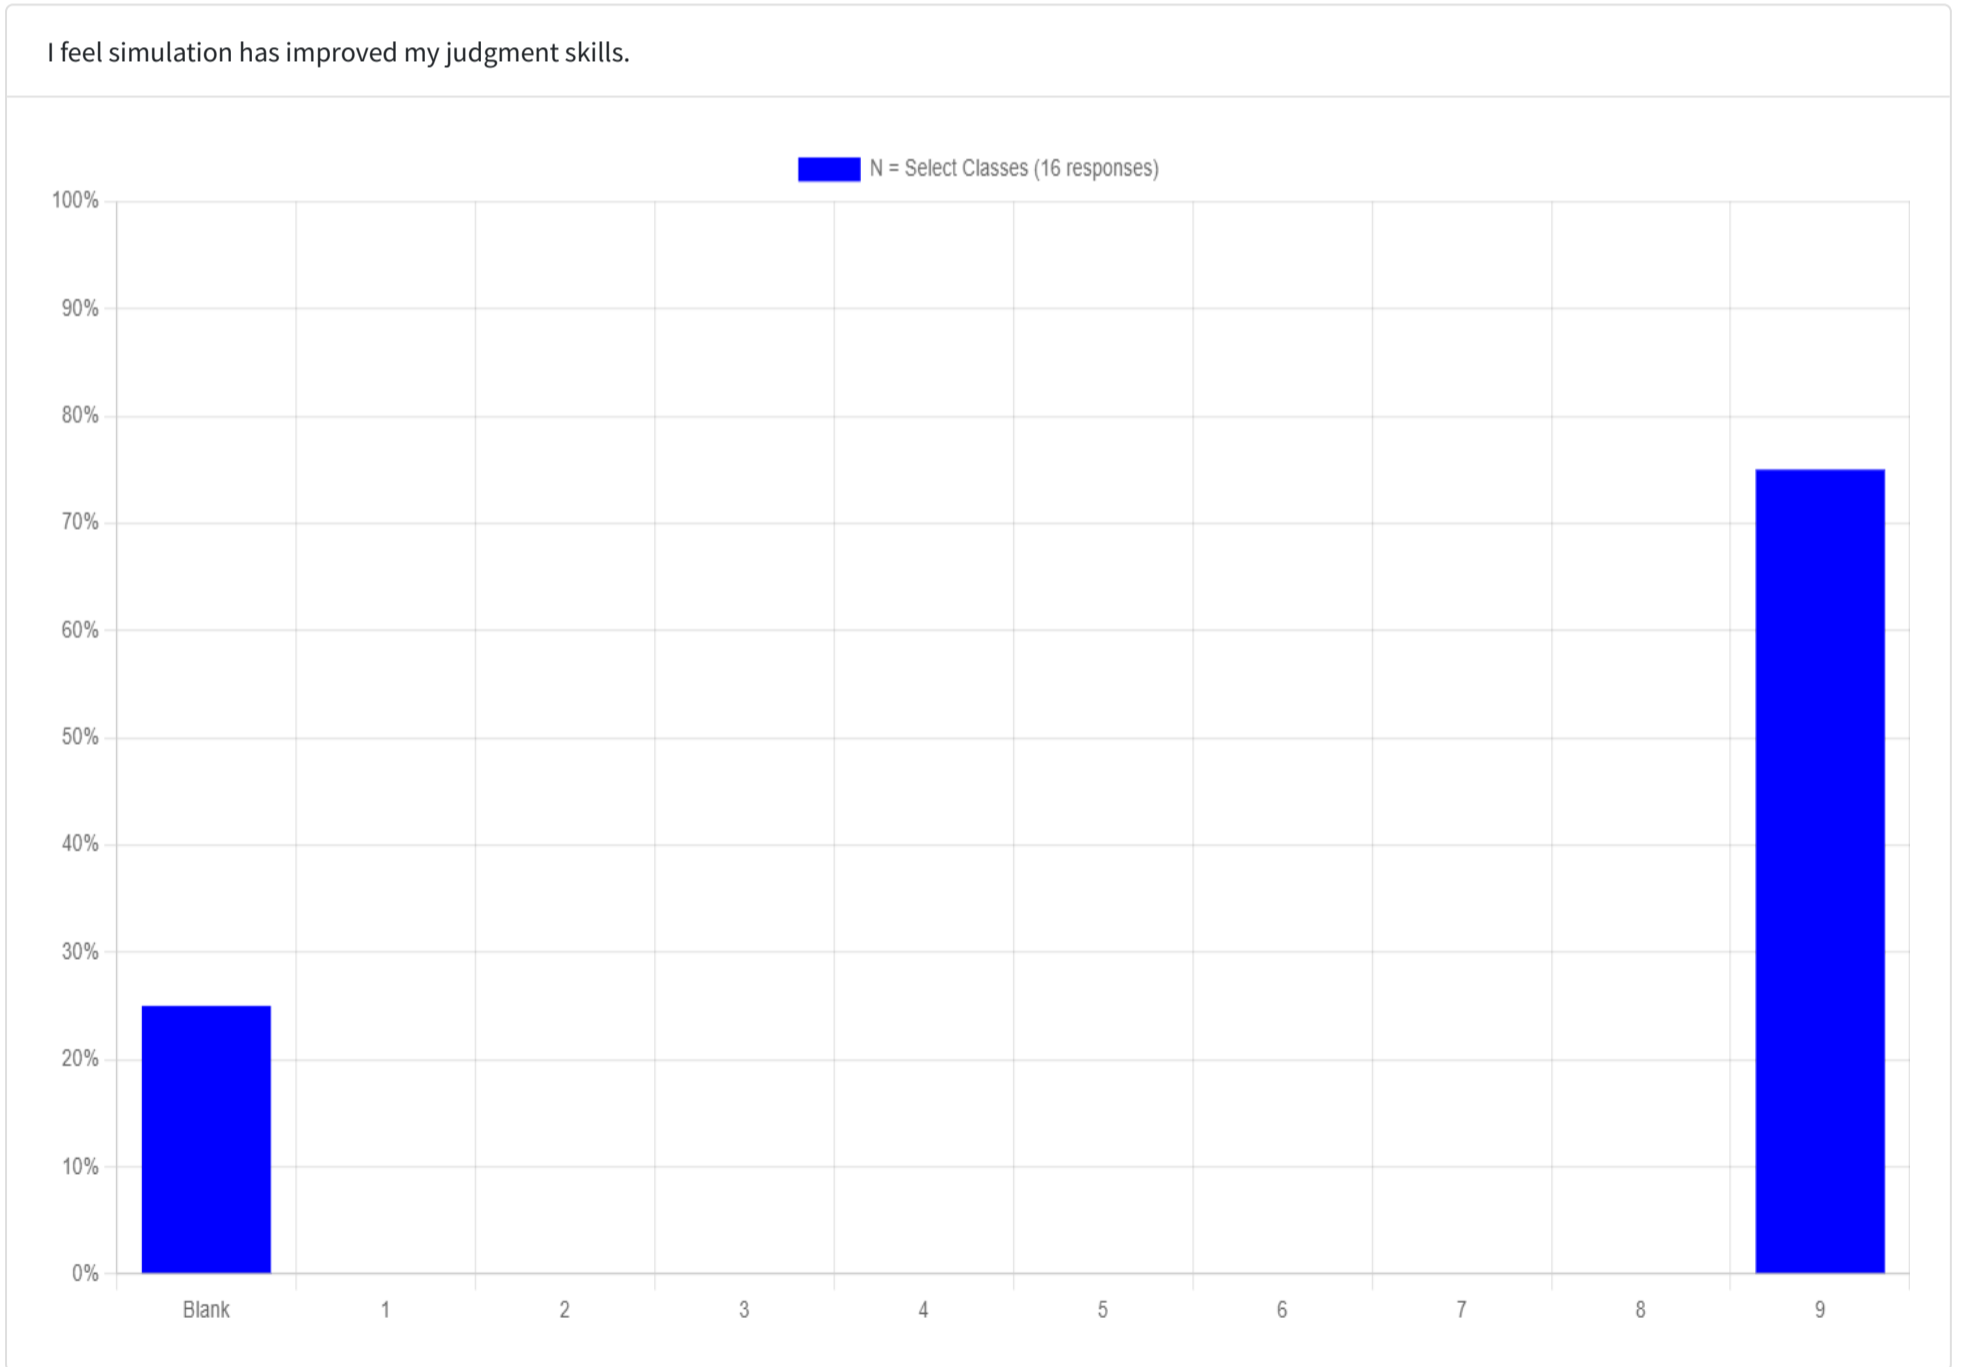

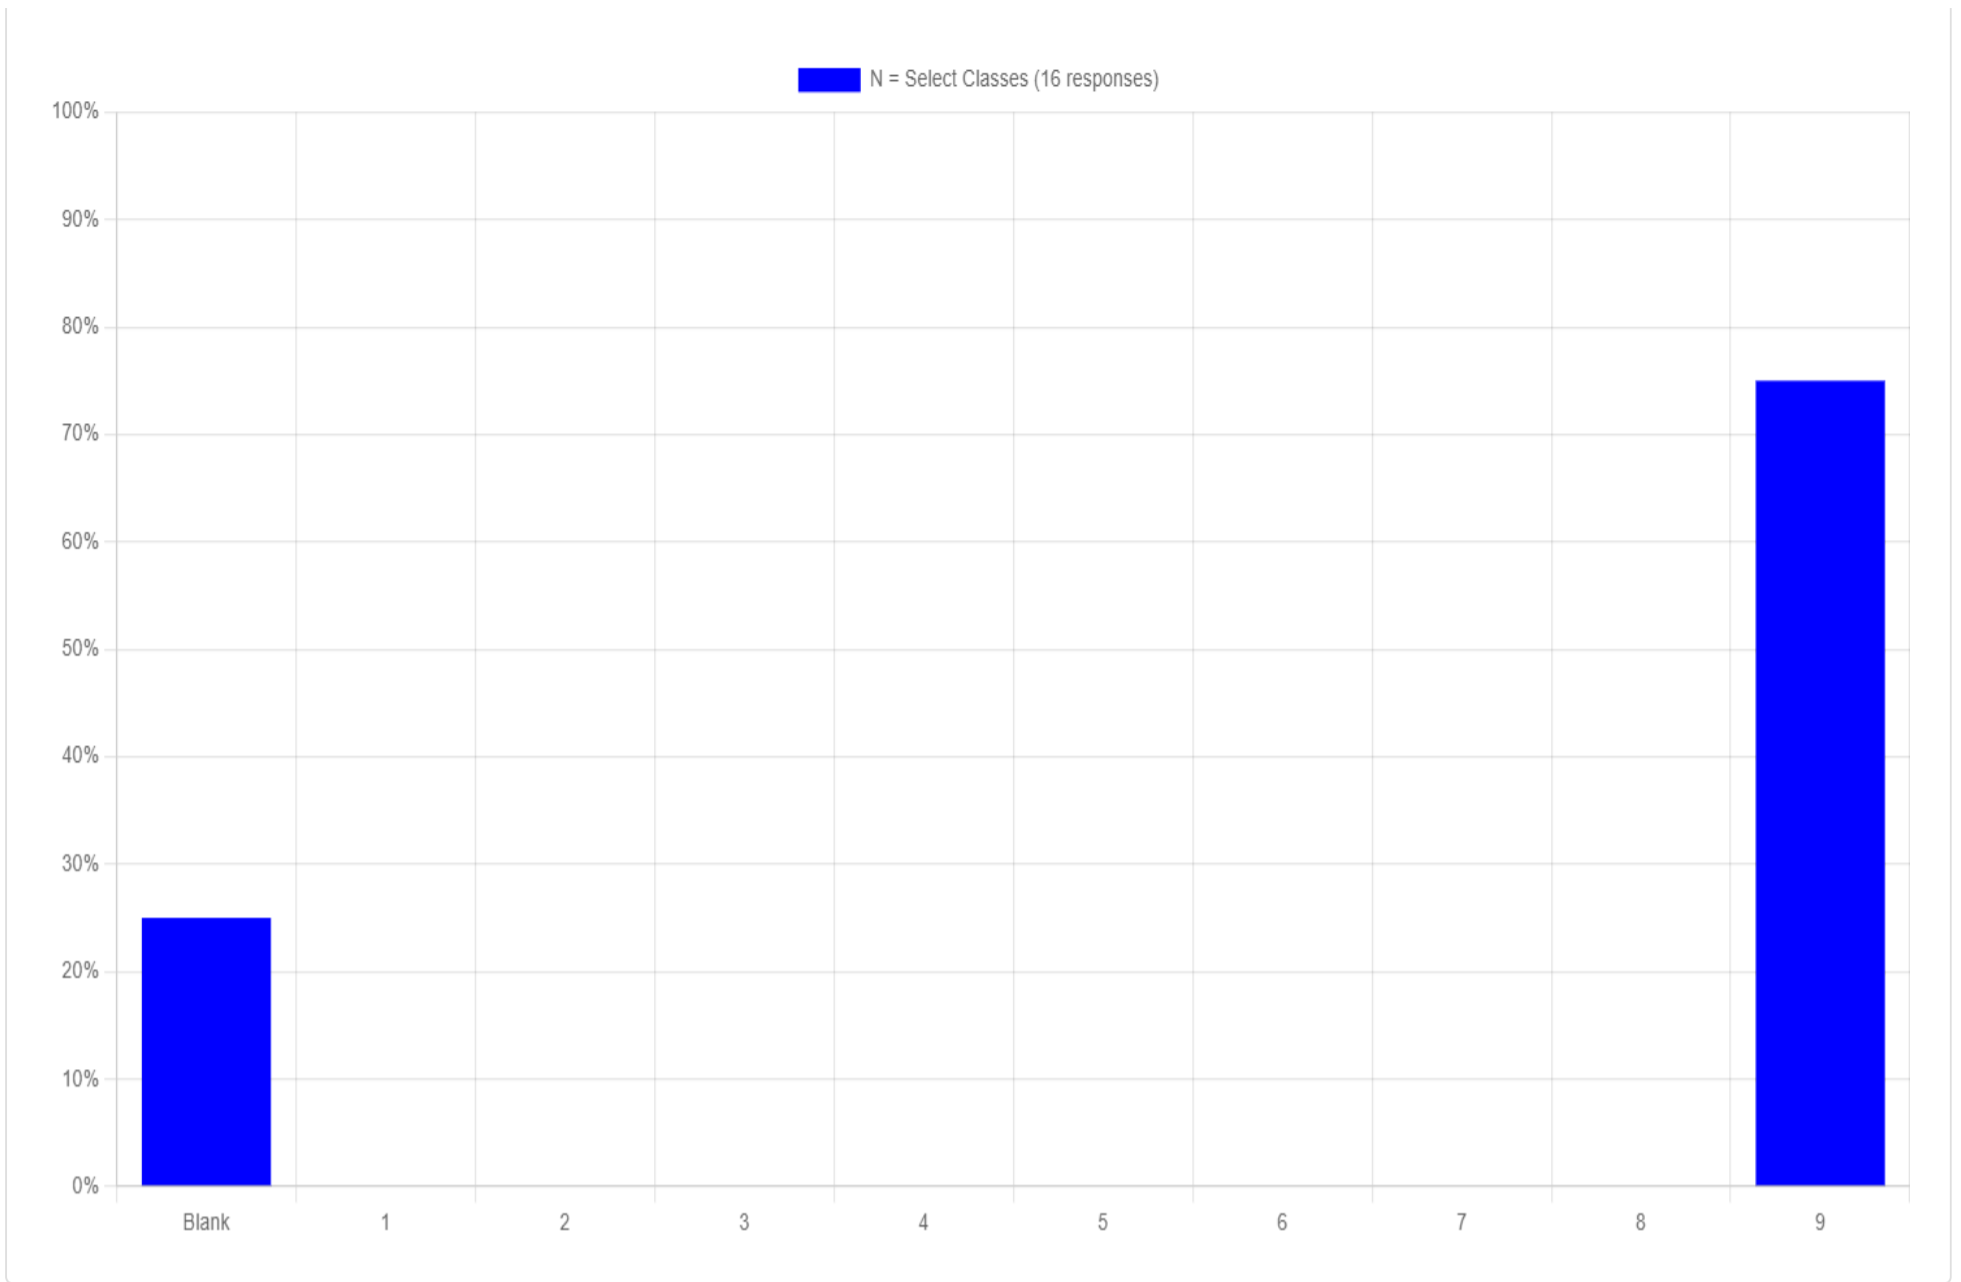

A review of contrast reactions before the simulations would be helpful.

The simulation scenarios were realistic.

N = Select Classes (16 responses)

The simulation scenarios were challenging.

N = Select Classes (16 responses)

I feel simulation has improved my technical skills.

N = Select Classes (16 responses)

I feel simulation has improved my medical knowledge.

N = Select Classes (16 responses)

I feel simulation has improved my judgment skills.

N = Select Classes (16 responses)

I feel simulation has improved my confidence.

N = Select Classes (16 responses)
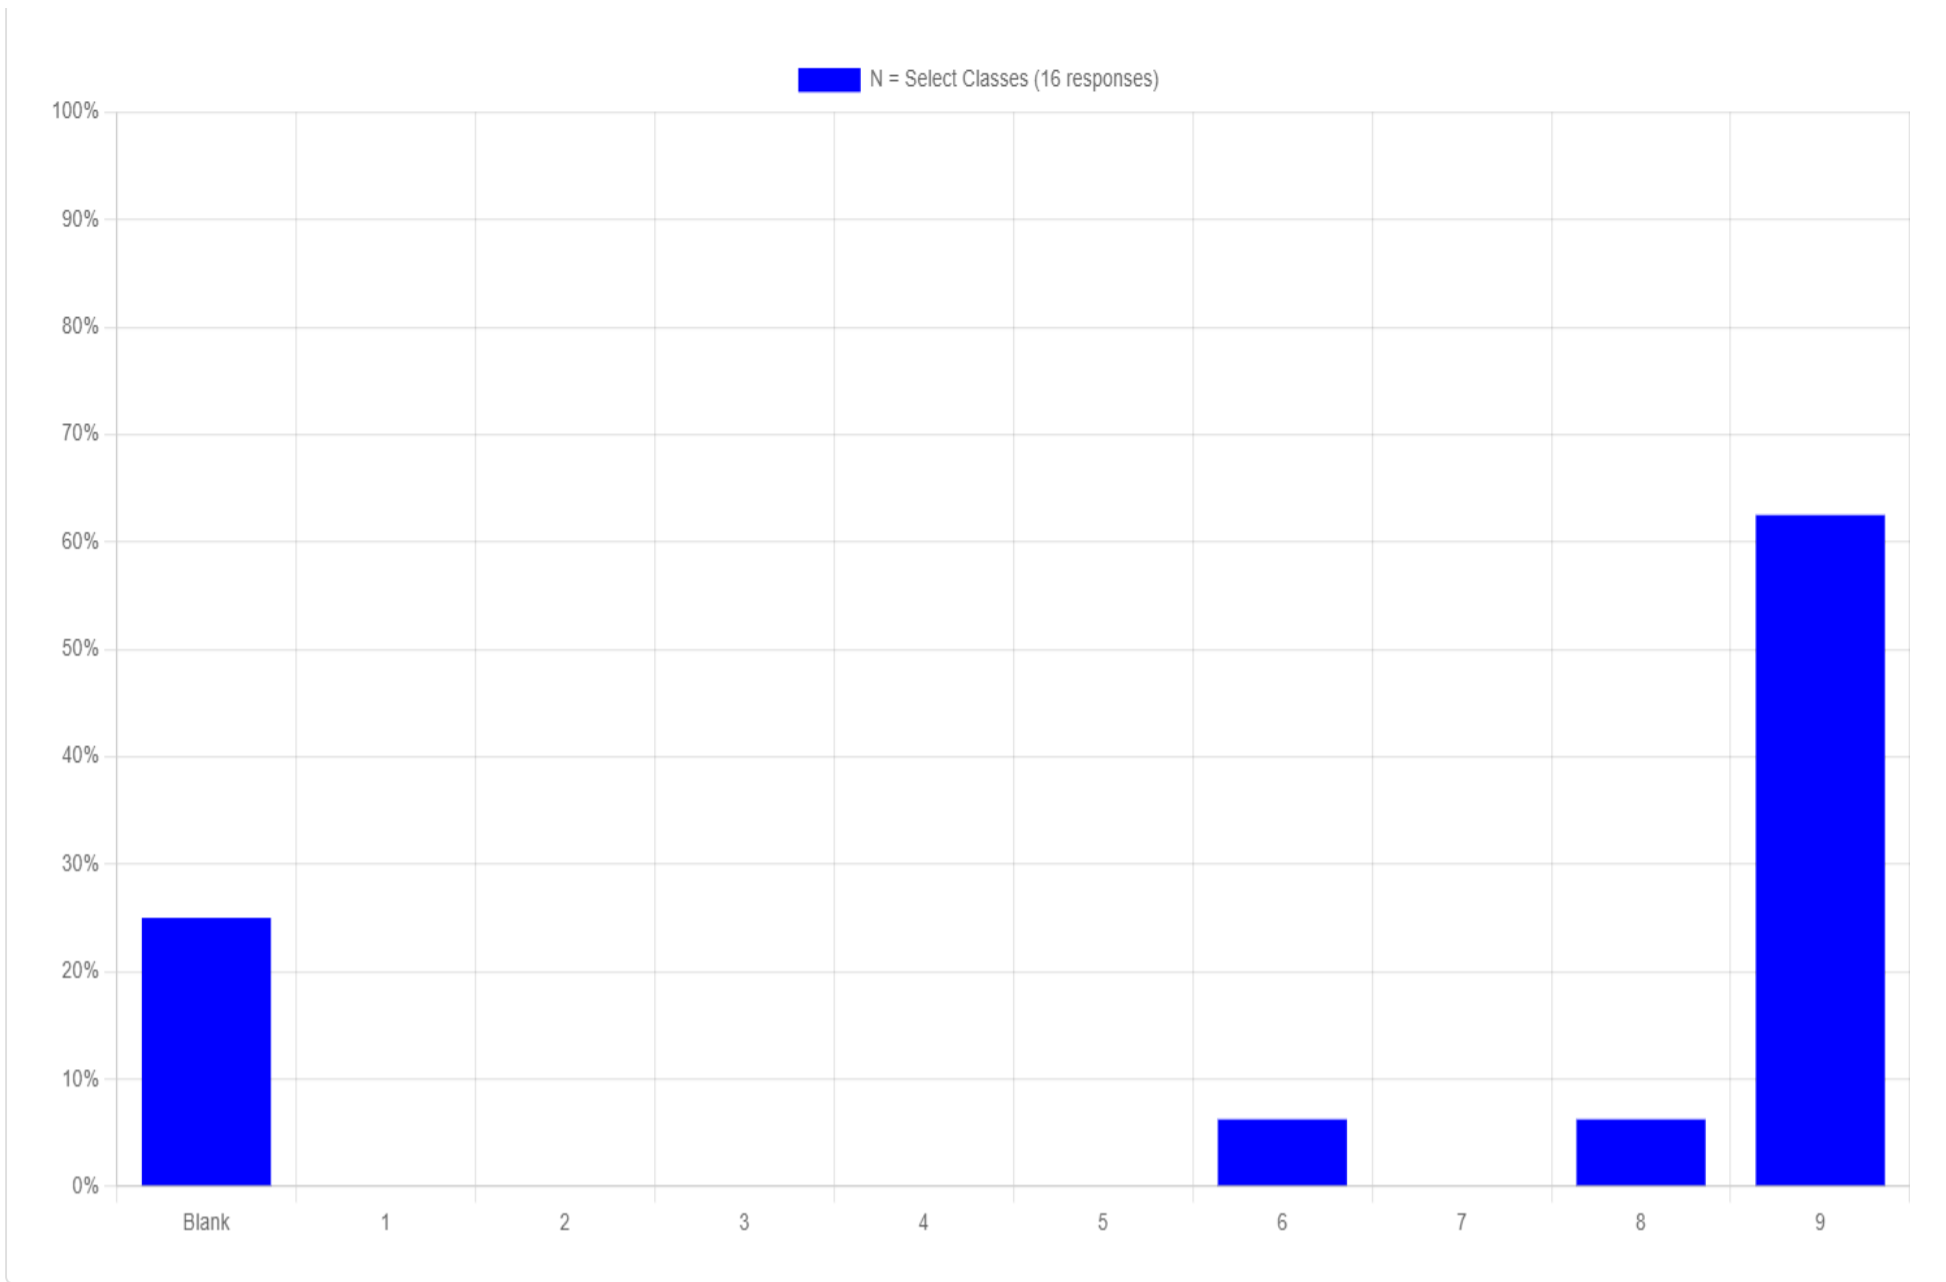

I feel confident in successfully responding to a contrast reaction event in an outpatient setting.
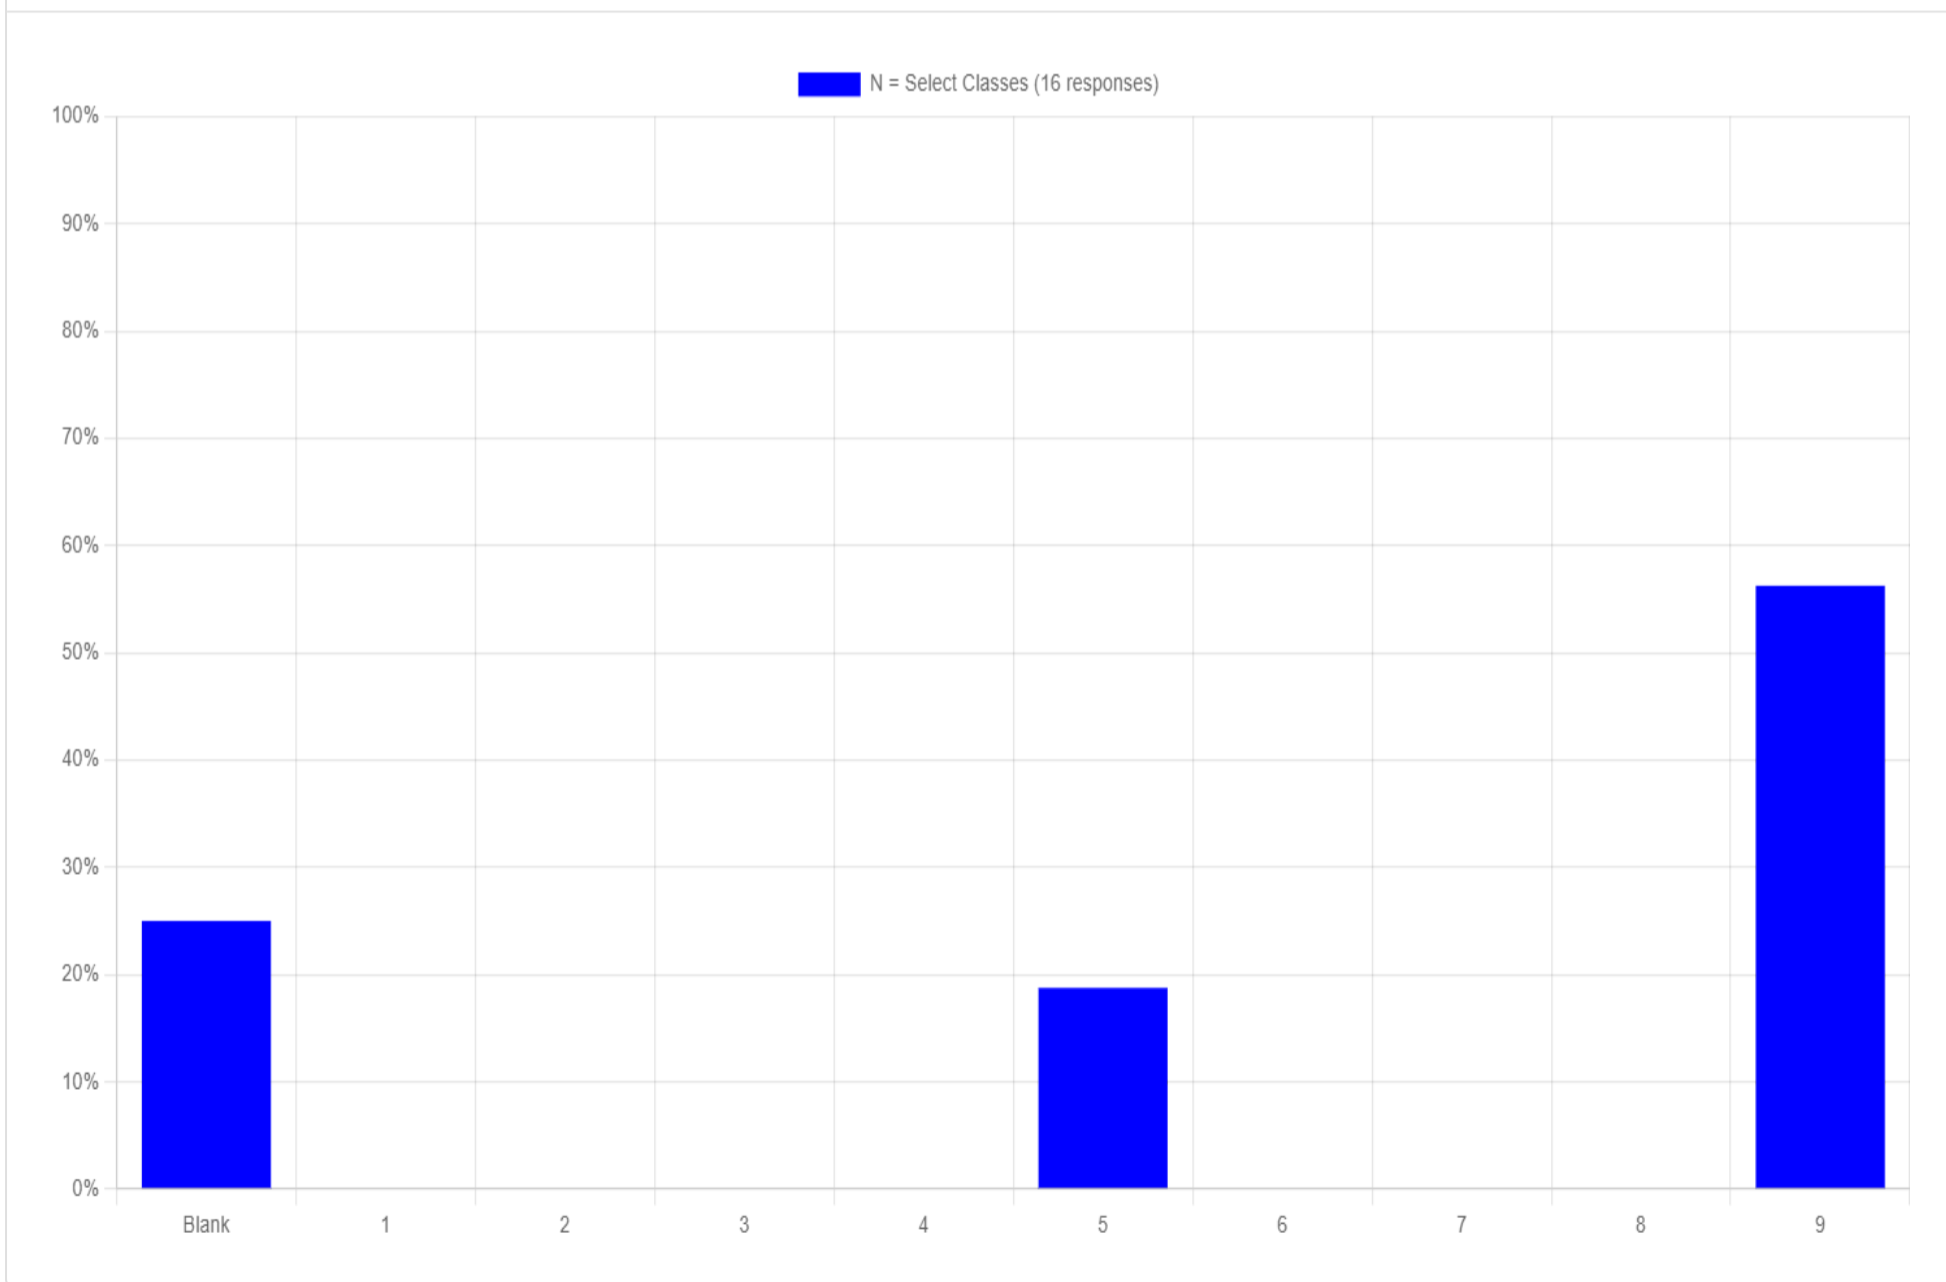

N = Select Classes (16 responses)

I feel confident in successfully responding to a contrast reaction event in an inpatient setting.

N = Select Classes (16 responses)
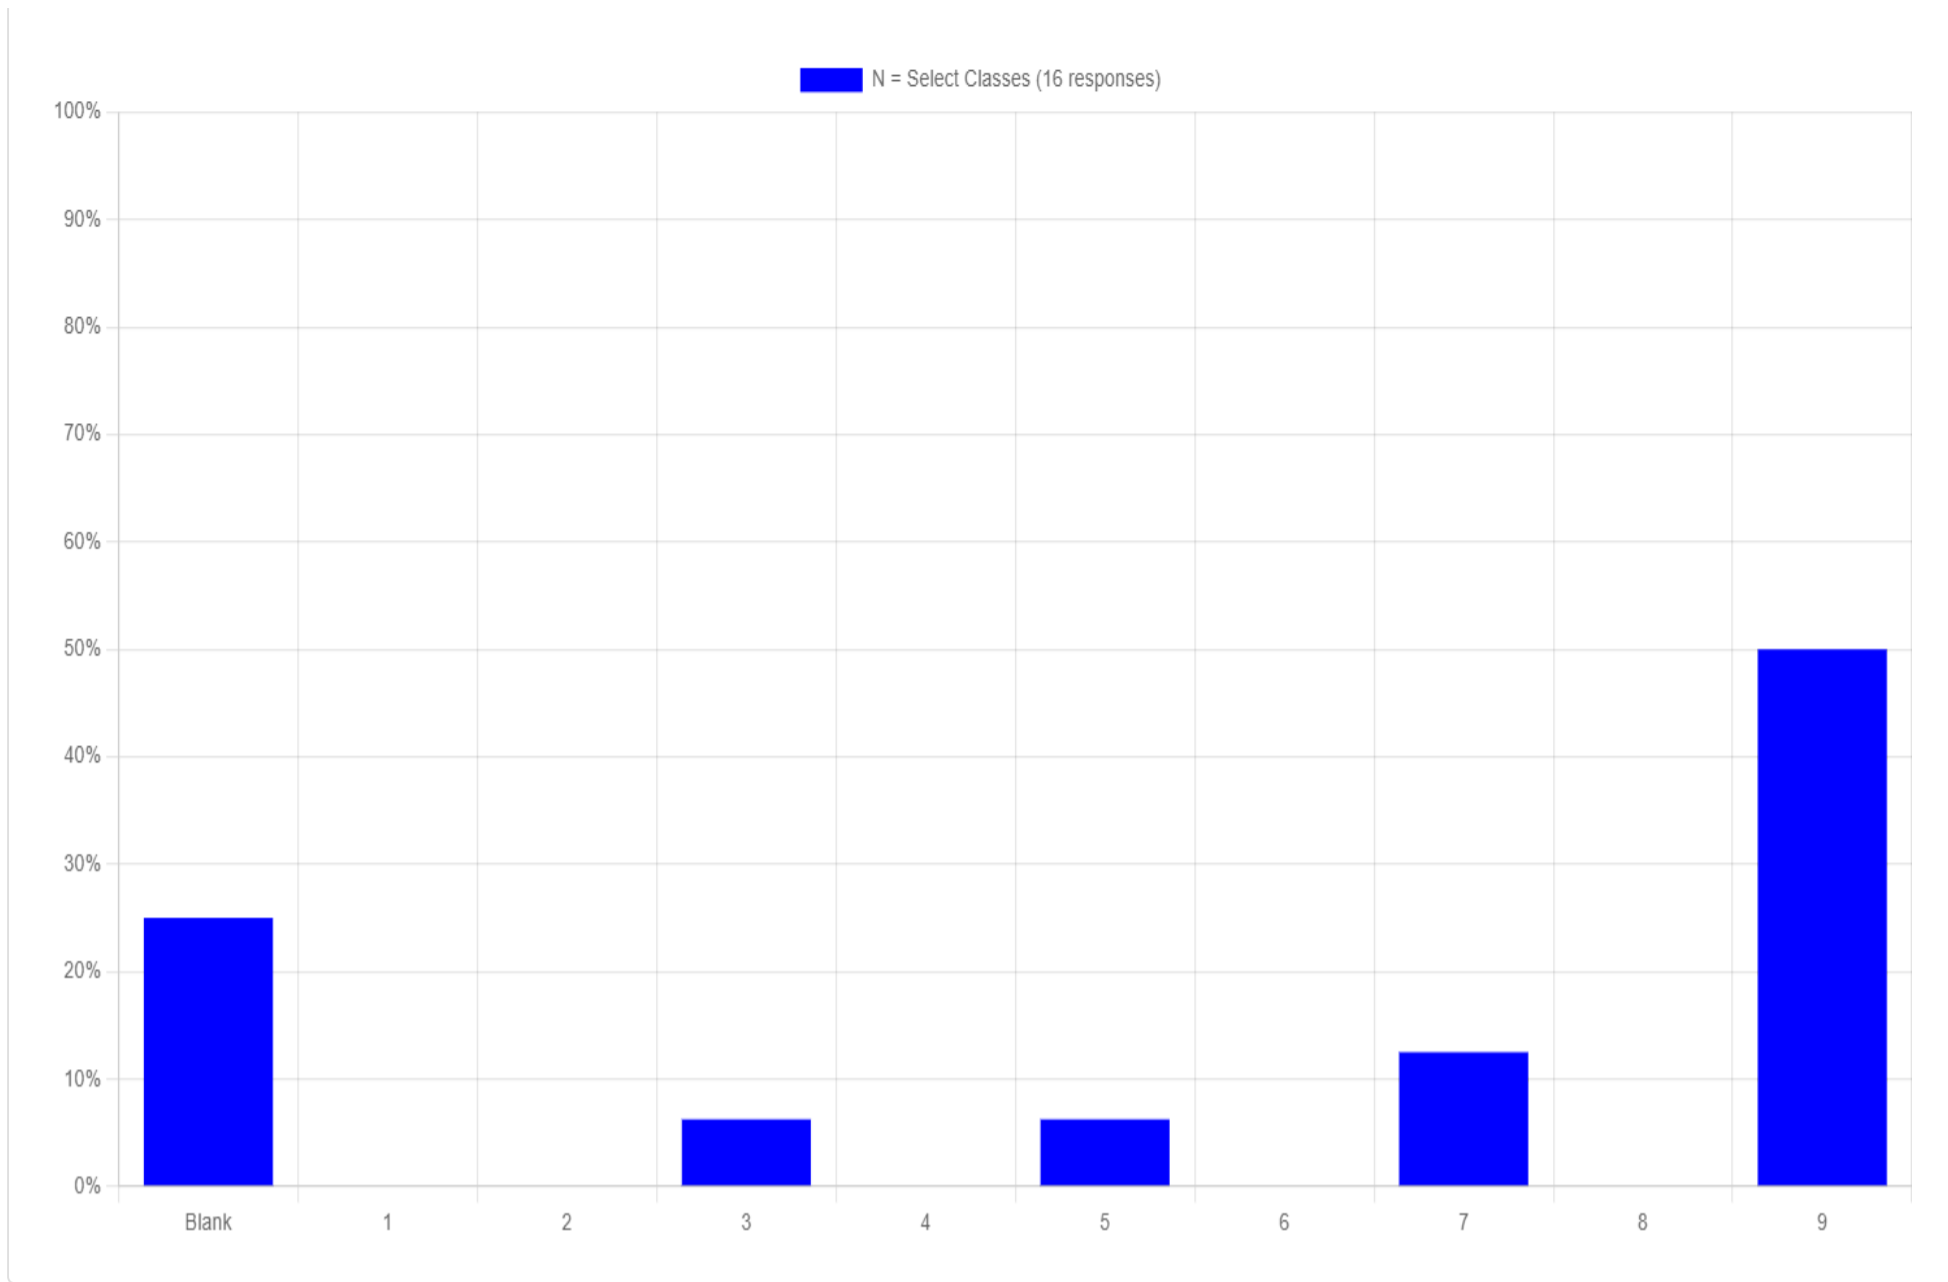

How competent are you at identifying and managing contrast reactions *after* taking this course?

N = Select Classes (16 responses)
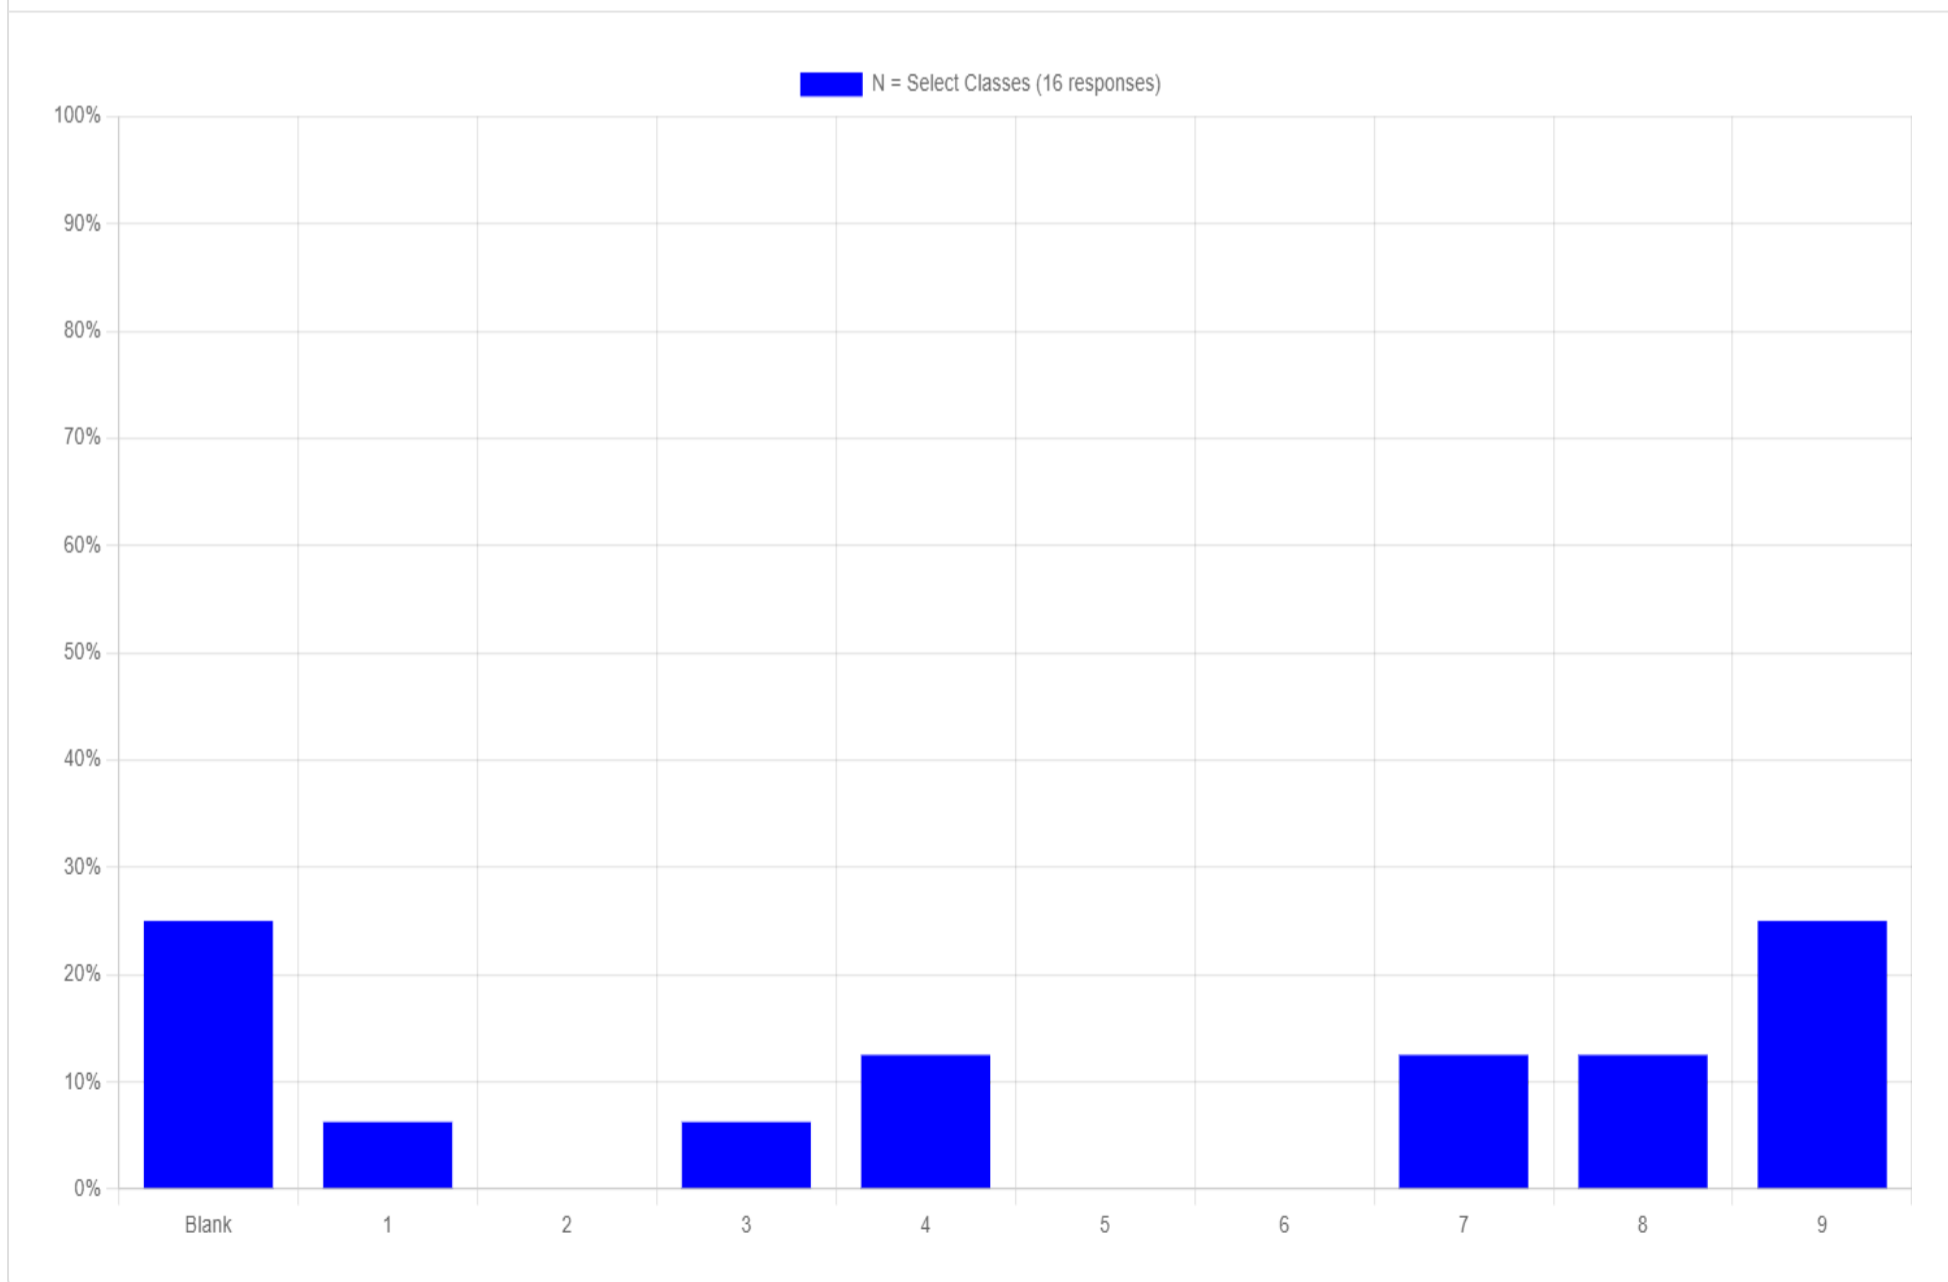

I found simulation based training to be more helpful than an online presentation alone.

Additional Comments.

Last time I took the class the groups were larger. I learned more with this smaller class.

The online course curriculum was helpful.
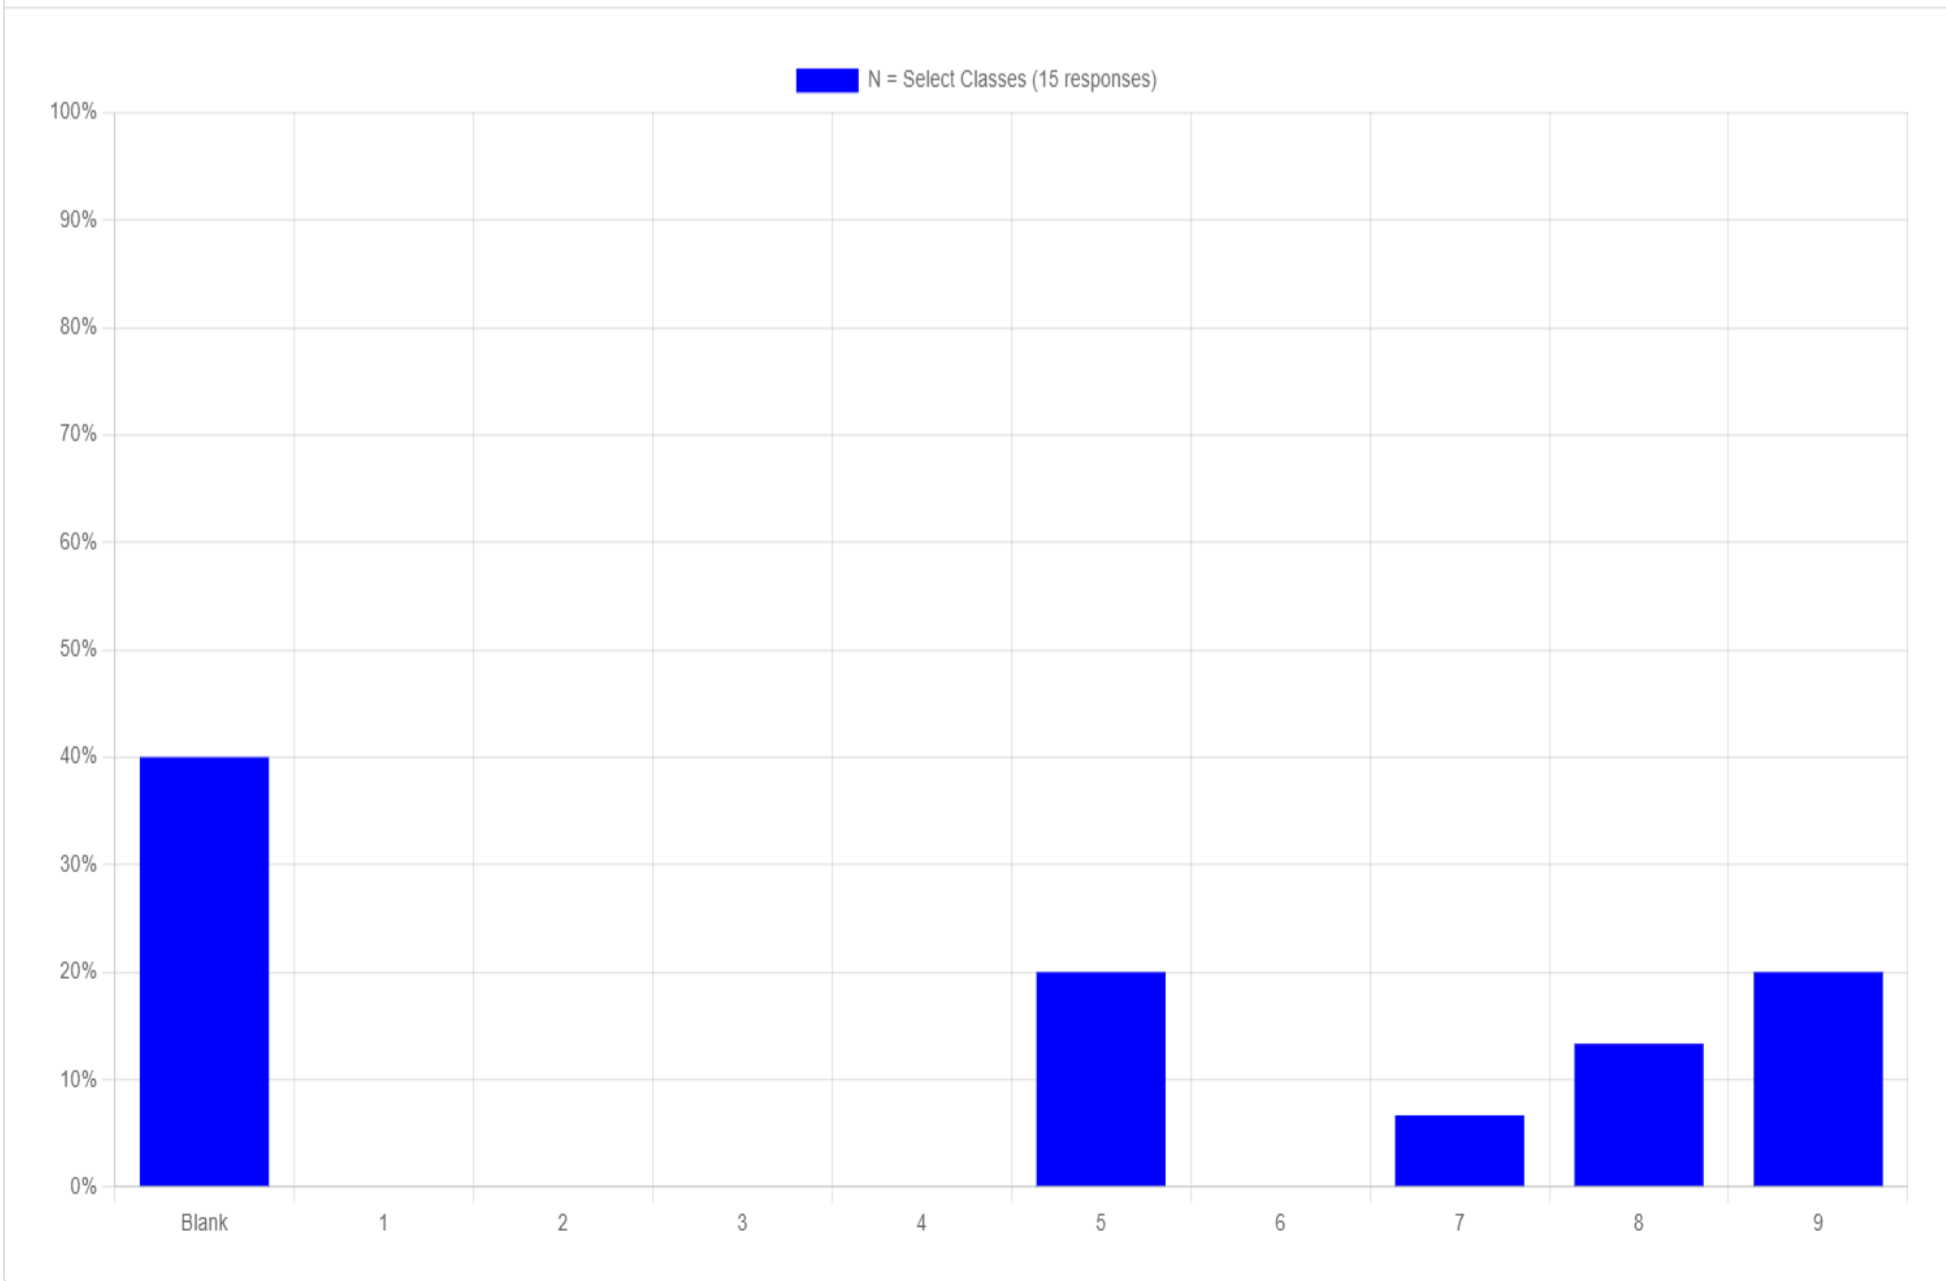

N = Select Classes (16 responses)
