Welcome!

While we wait to start, please review ways to navigate this webinar.

If you move your **cursor** to the **bottom** of **your screen** you will see a **menu**.

This menu allows you to **control**:

- **Raise Hand**
- Access to the **Chat** box
- Access to the **Q & A** box

Camera options are not available for participants. Participants can be unmuted by raising their hand and being recognized by the presenter.

Continuing Education Information

In support of improving patient care, this activity has been planned and implemented by the University of Pittsburgh and The Jewish Healthcare Foundation. The University of Pittsburgh is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME) and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team. **1.25 hours is approved for this course**.

As a Jointly Accredited Organization, University of Pittsburgh is approved to offer social work continuing education by the Association of Social Work Boards (ASWB) Approved Continuing Education (ACE) program. Organizations, not individual courses, are approved under this program. State and provincial regulatory boards have the final authority to determine whether an individual course may be accepted for continuing education credit. University of Pittsburgh maintains responsibility for this course. Social workers completing this course receive **1.25 continuing education credits.**

Disclosures

All individuals in a position to control the content of this education activity have disclosed all financial relationships with any companies whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients. All of the relevant financial relationships for the individuals listed below **have been mitigated**

- Mark S. Wolff, DDS, PhD, Colgate Palmolive, Consultant

No other members of the planning committee, speakers, presenters, authors, content reviewers and/or anyone else in a position to control the content of this education activity have relevant financial relationships with any companies whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients.

Disclaimer

The information presented at this Center for Continuing Education in Health Sciences program represents the views and opinions of the individual presenters, and does not constitute the opinion or endorsement of, or promotion by, the UPMC Center for Continuing Education in the Health Sciences, UPMC/University of Pittsburgh Medical Center or affiliates and University of Pittsburgh School of Medicine. Reasonable efforts have been taken intending for educational subject matter to be presented in a balanced, unbiased fashion and in compliance with regulatory requirements. However, each program attendee must always use his/her own personal and professional judgment when considering further application of this information, particularly as it may relate to patient diagnostic or treatment decisions including, without limitation, FDA-approved uses, and any off-label uses.

Mutual Agreement

- Everyone on every Program Evaluation and Research Unit (PERU) webinar is **valued**. Everyone has an expectation of **mutual, positive regard** for everyone else that respects the **diversity** of everyone on the webinar.
- We operate from a **strength-based, empathetic, and supportive** framework – with the people we serve, and with each other on PERU webinars.
- We encourage the use of **affirming language** that is not discriminatory or stigmatizing.
- We treat others as **they** would like to be treated and, therefore, avoid argumentative, disruptive, and/or aggressive language.

Mutual Agreement (continued)

- We strive to: **listen** to each person, avoid interrupting others, and seek to **understand** each other through the Learning Network as we work toward the highest quality services for Centers of Excellence (COE) clients.
- Information presented in Learning Network sessions has been vetted. We recognize that people have different opinions, and those **diverse perspectives** are welcomed and valued. Questions and comments should be framed as **constructive feedback**.
- The Learning Network format is **not conducive to debate**. If something happens that concerns you, please send a chat during the session to the panelists and we will attempt to make room to address it either during the session or by scheduling time outside of the session to process and understand it. Alternatively, you can reach out offline to your PERU point of contact.

“Conflict of Interest Disclosure”

Dr. Mark S. Wolff, Morton Amsterdam Dean, receives compensation from the Colgate-Palmolive Company for activities, consulting and speaking engagements, that are not related to his responsibilities to University of Pennsylvania School of Dental Medicine.

Subjects for this presentation

- Describe the impact of opioid use on oral health
- Describe the importance and available training for fluoride treatment
- Discuss specific considerations for those receiving medications for opioid use disorder (MOUD)
- Discuss the importance of regular dental check-ups and preventive care
- Address stigma and barriers to accessing dental care for individuals with OUD

Substance use disorder in the United States (2020)

40.3 million Americans (14.5%)

- 28.3 million who had alcohol use disorder
- 18.4 million who had an illegal substance use disorder (SUD)
- 11.9 million who had an illegal substance use disorder, but not alcohol use disorder

Why do we get decay?

W.D. Miller's Acid Decalcification Theory – 1890

Step 1:

Fermentable carbohydrates

Acidogenic Bacteria

Acids

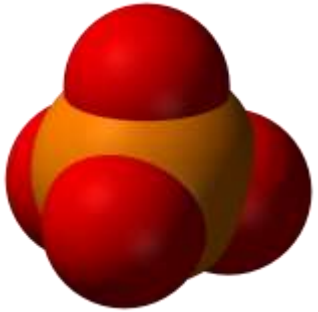
Step 2:

Tooth mineral

Bacteria Produced Acids

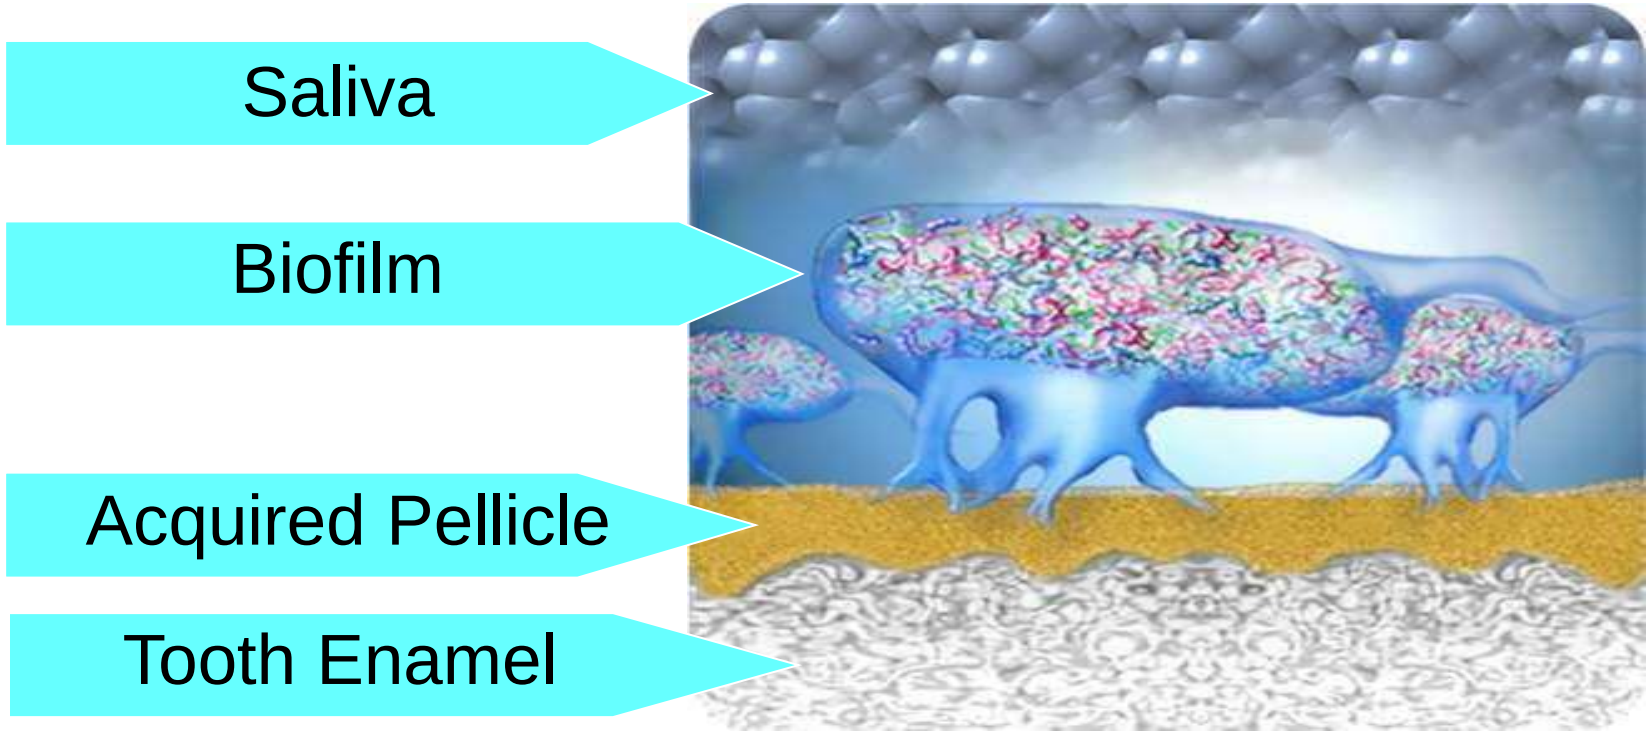
Calcium

\+



Phosphate ions

Why do we get decay?



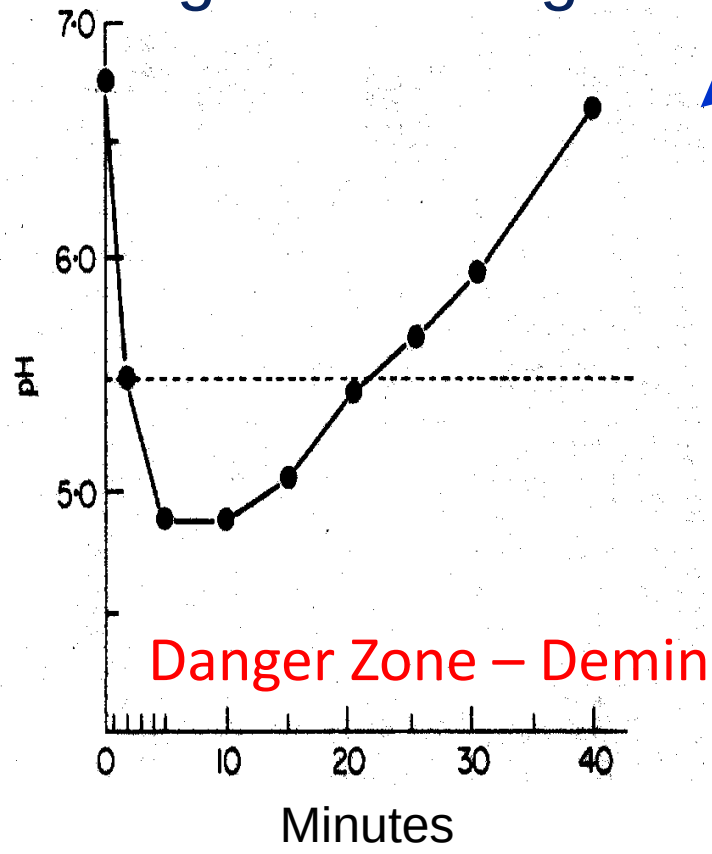
Depiction of Plaque Biofilm (Overman, 2000)

Stephan Curve

Sugar source

pH drop

Measure of Plaque pH after Sugar Challenge



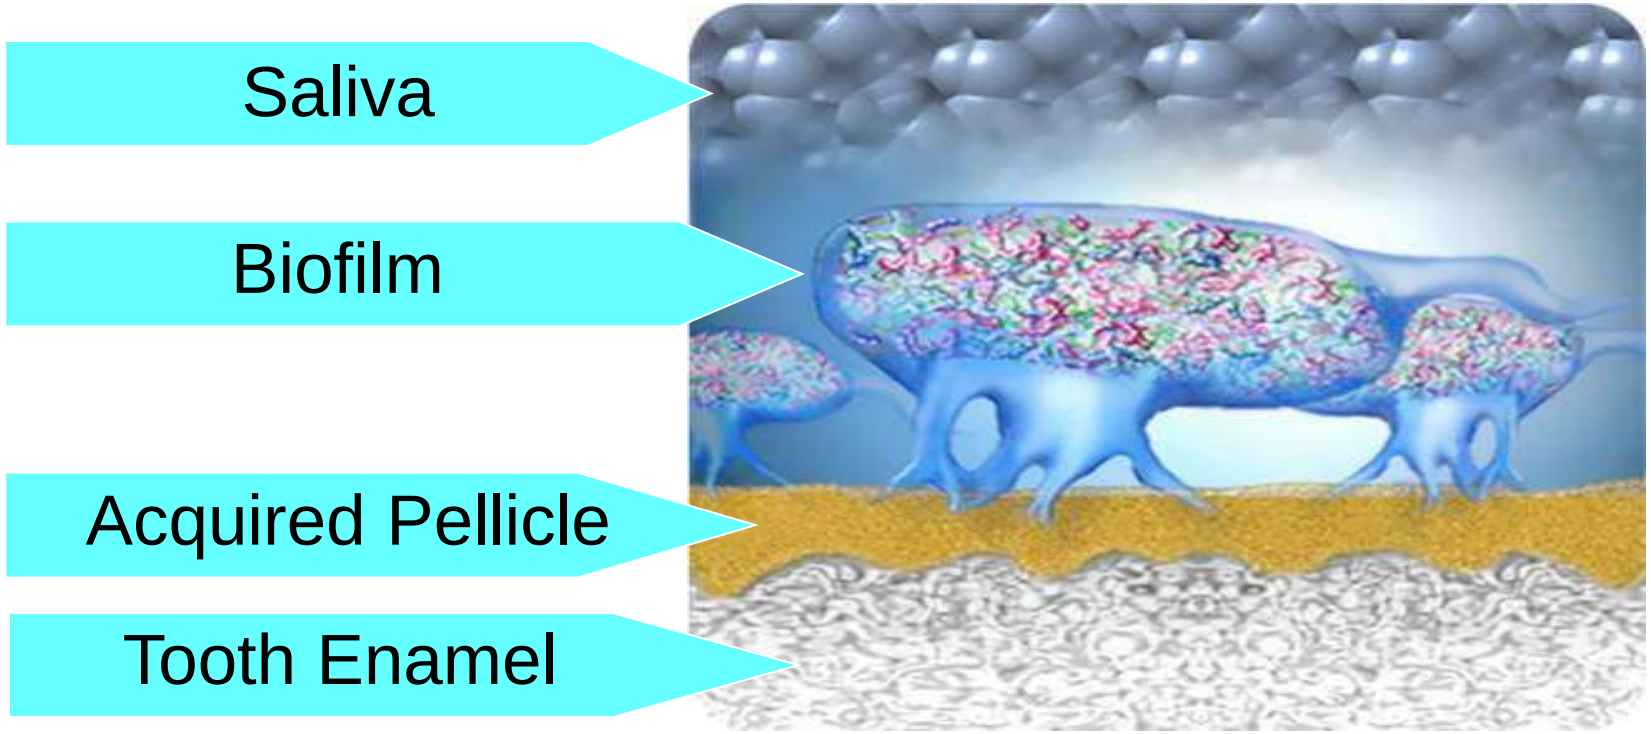
pH rebounds to normal value

Terminal pH = After sugar challenge

Danger Zone – Demineralization

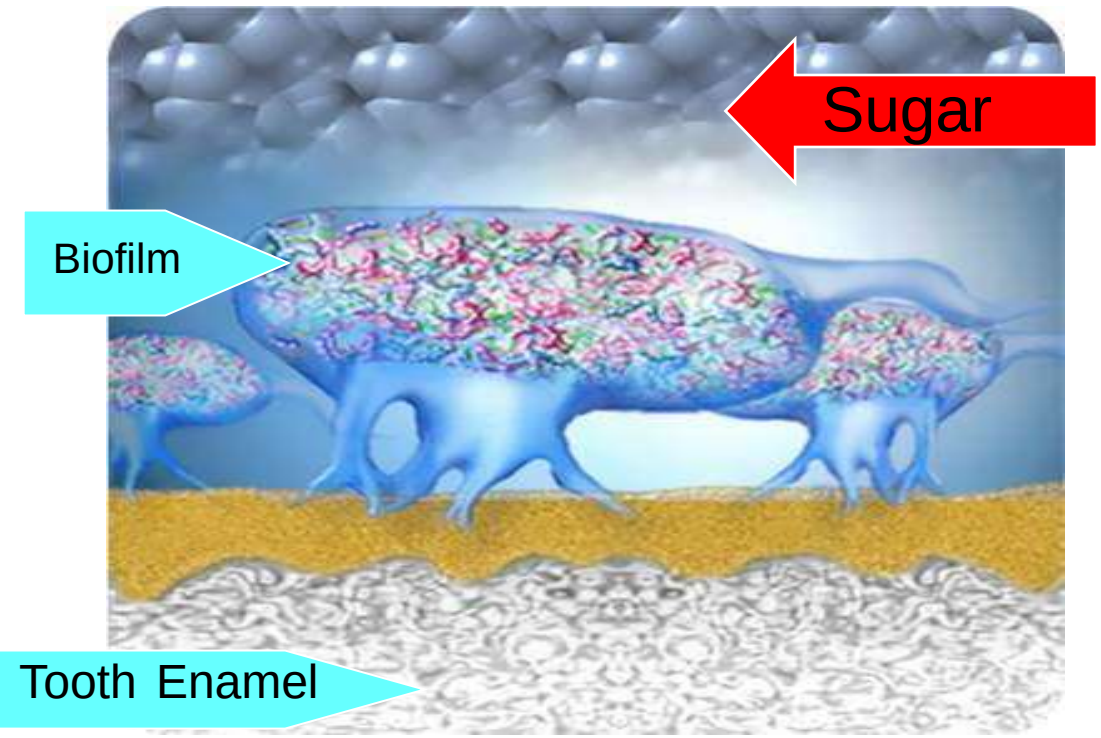
Jenkins G. The Physiology and Biochemistry of the Mouth. 1978.

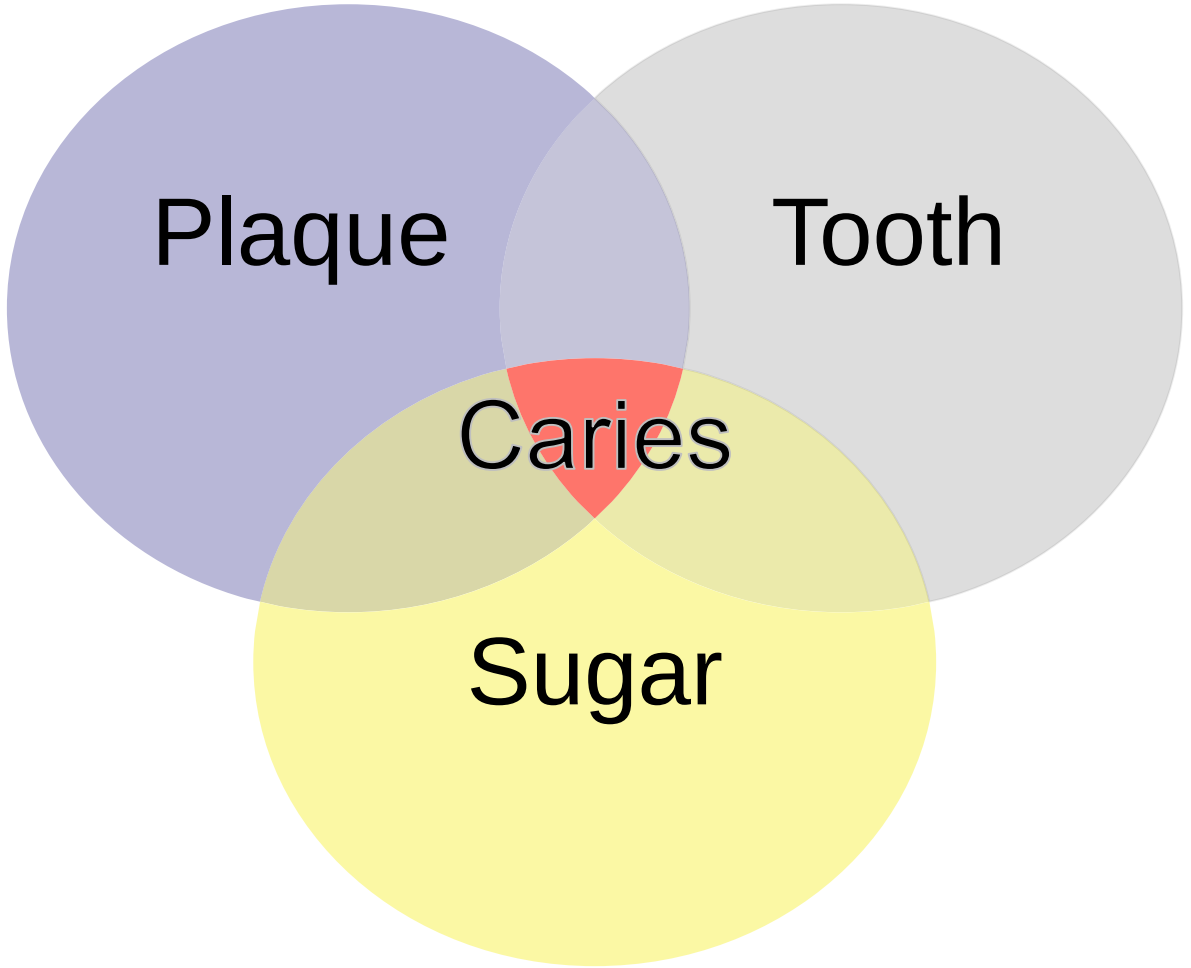
What is Plaque/Biofilm?



Depiction of Plaque Biofilm (Overman, 2000)

Source of Caries Problem



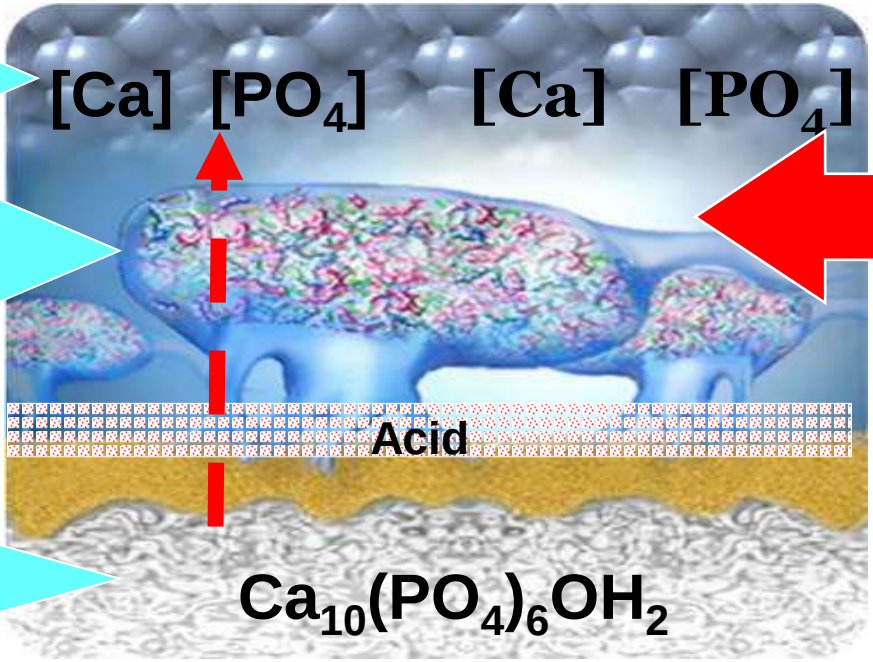


Formation of Decay

Saliva

Biofilm

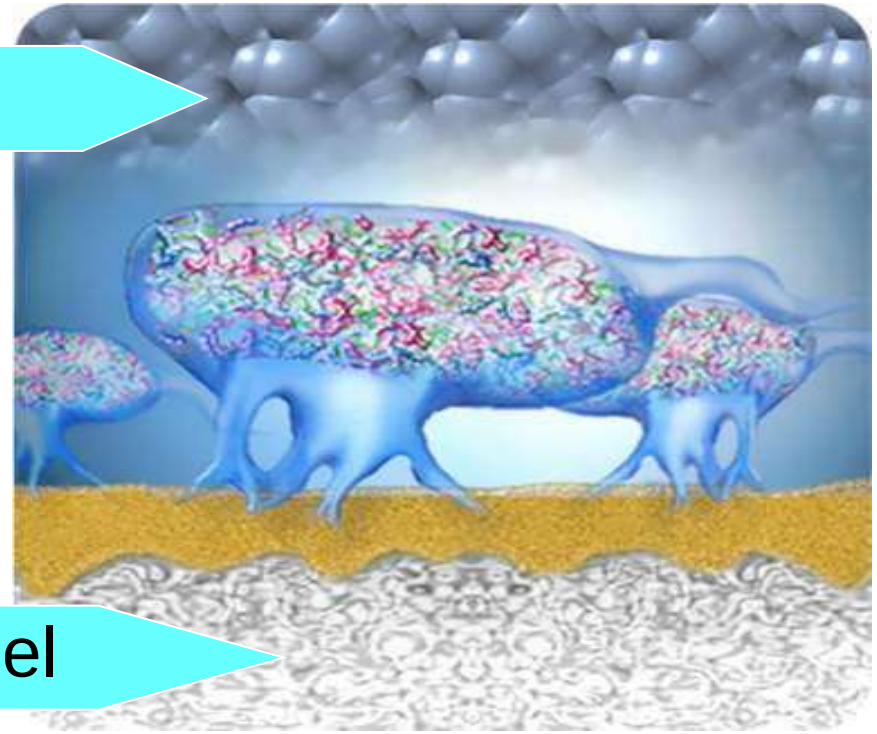
Tooth Enamel



Sugar

pH drops <5.5 and Ca + PO_4 move out of enamel

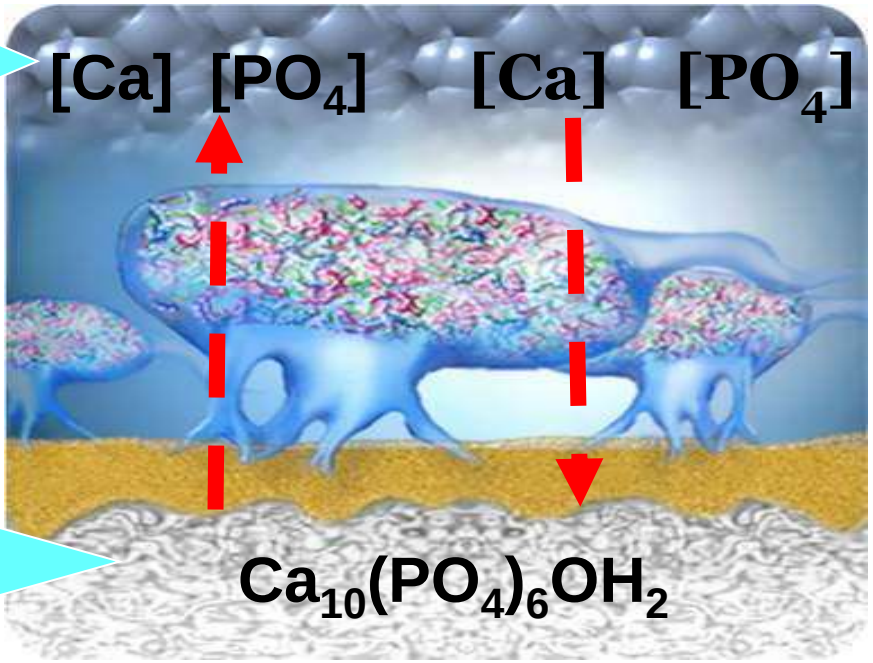
Role of Saliva



- Contains bicarbonate
  - Excellent buffer
- Flushing action to wash away carbohydrate substrates and neutralize acids
- Supersaturated with Ca and PO_4
  - Same as tooth mineral

With Saliva, a Normal pH is restored….pH 7

Saliva



Tooth Enamel

No Cavitation Occurs

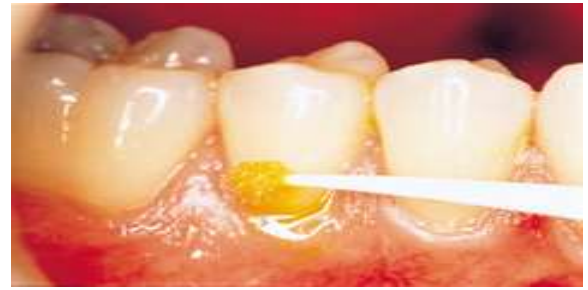
Application of varnish

- Clean the teeth (prophylaxis not required)
- No need to dry the teeth
- Use small brush or cotton tip applicator
- Apply 0.25-0.75ml to teeth
- No brushing or chewing for 4 hours
- Quick: 30 seconds to 2 minutes



Occlusal buccal and lingual

Exposed dental necks, interdental spaces

Why Fluoride Varnish?

- Simple to apply
- Safe
- Low unit cost
- No special equipment or cleanings needed
- Proven record in decay reduction

IT WORKS!

40%-70% Reduction!

When should fluoride varnish be applied?

- From the efficacy point of view:
  - As frequent as possible (*within reason* ☺) to patients at increased risk for dental caries

- From the cost/effectiveness point of view:
  - 2-4 times/year
  - Repeated application in short time (e.g., weekly for 3 weeks)

Medications for Opioid Use Disorder

Addiction Medicine Specialist:

- Methadone
- Buprenorphine
- Naltrexone

They **cause dry mouth**….

May **increase cravings**…
particularly sweets!

Addressing the stigma and barriers to accessing dental care

Finding a dentist willing to treat individuals with OUD

- Helping keep the individuals with OUD in active care
- Helping the dentist succeed by positive reinforcement
- Helping the dentist navigate care for the individual with OUD

Fluoride Varnish

Safe and effective

- Prevention of caries and of evolution of caries process
- Very low risk of ingestion due to the varnish form
- Outstanding evidence-based clinical dossier

Easy to use

- Quick and easy application
- No prolonged immobilization in chair
- Painless, well accepted by patients
- Can be applied in a variety of settings

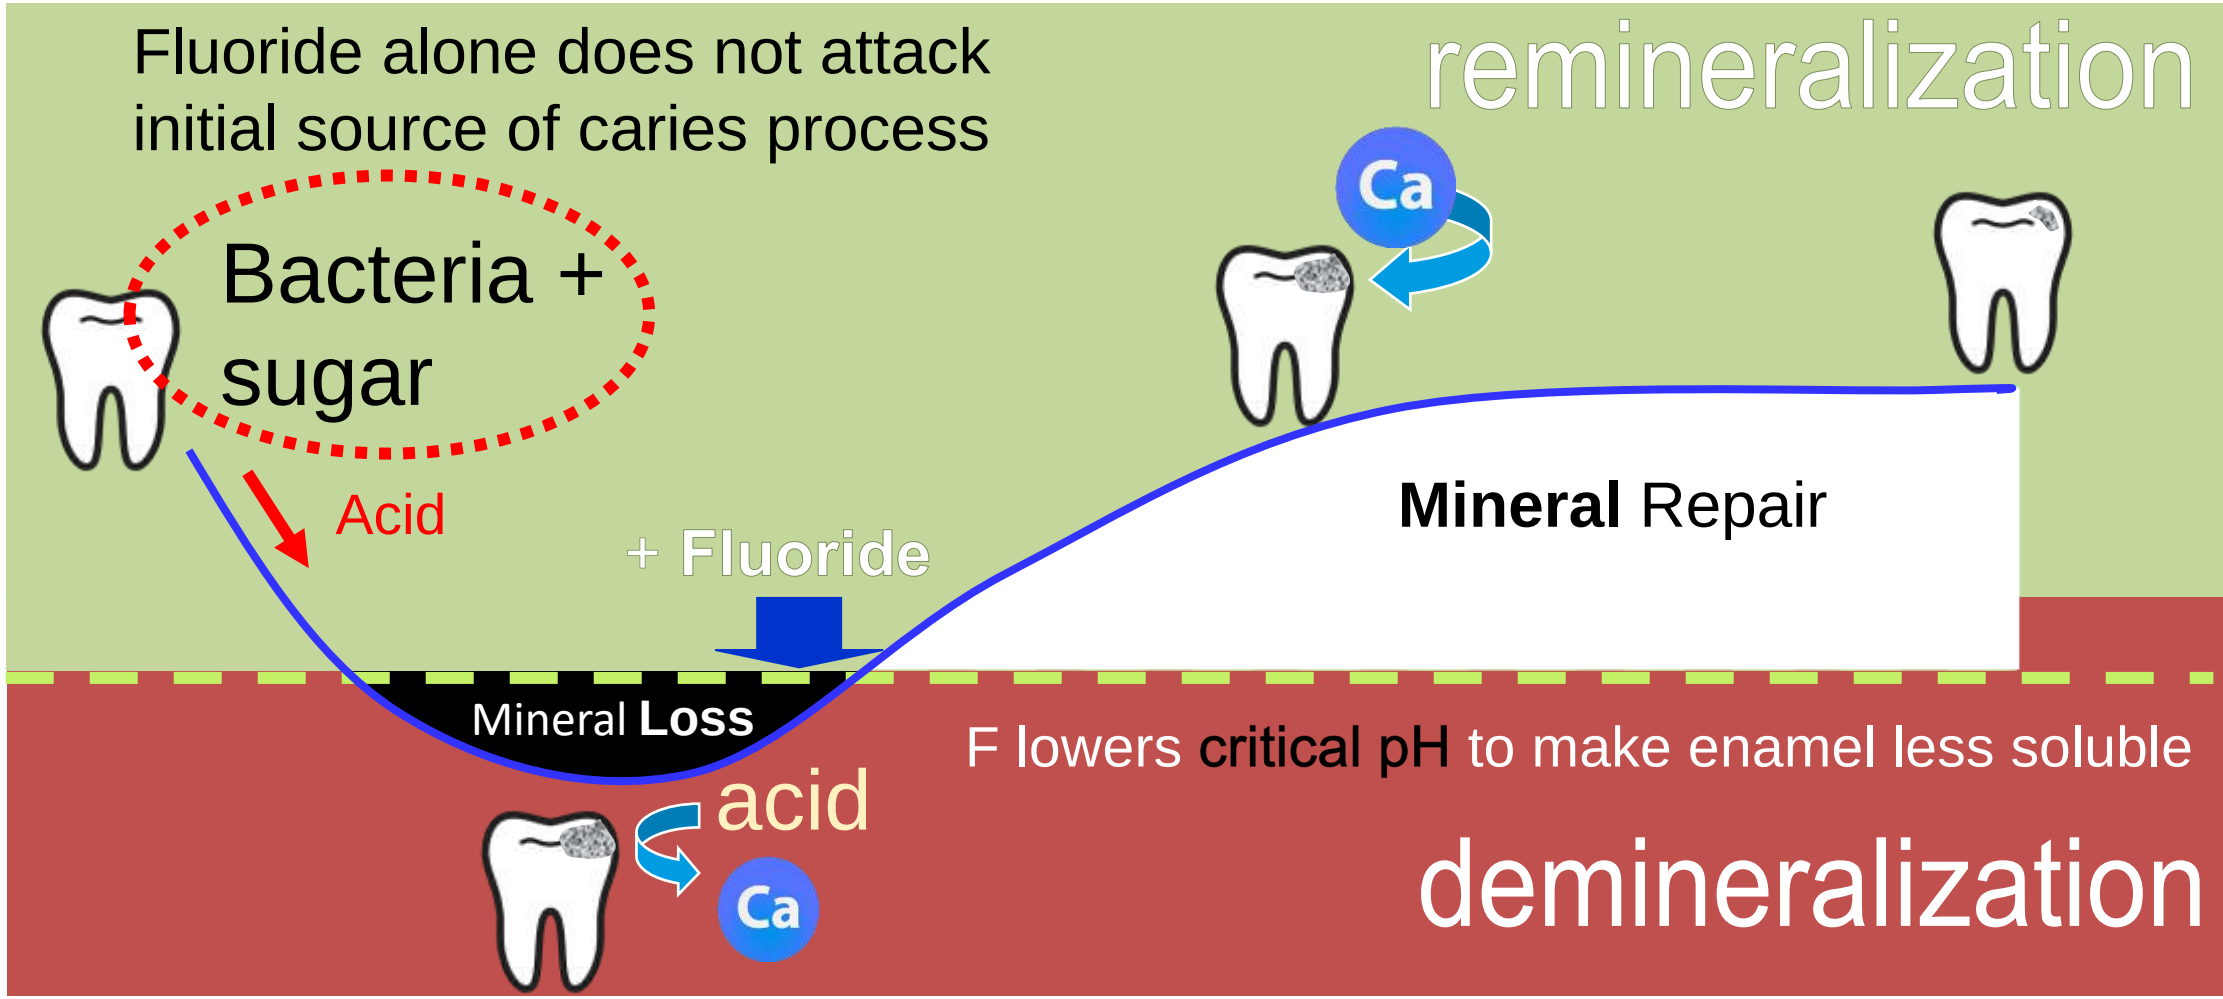
Fluoride

Fluoride Decreases Demineralization, Promotes Remineralization and Arrests Caries



Oral Health Recommendations for Individuals Receiving Medication Assisted Treatment (MAT)

Care Manager Role:

- Encourage engagement of dental professionals
- Apply fluoride varnish frequently (any primary care provider)
  - As frequently as once per month
- Provide toothbrushes and toothpastes
  - Brush for two minutes twice per day
- Restrict sugar consumption
