TOPICS:

Managing Special Populations

What is working and what is not working in populations such as Medicaid, Seniors and Maternity? How can we apply lessons learned in these areas to other populations as well as the population as a whole?

Patient Engagement and Perception within Value Based Care

How does the care experience within a value-based care array affect patient perceptions and engagement? Join us to learn from an industry expert about what can be learned from these patients and how they perceive care differently.

Learning Organization Approach

Ensuring the success of pilot programs can be a gamble. Hear from one of our members how their system applied a learning organization approach to their pilot programs, the elements and successes from this approach and how to apply these wins to other situations.

Member Updates

We will close the loop on several member presentations from the past two years to hear an up-to-date assessment of how these efforts are proceeding, including Pop Health Analyst Findings, Physician Compensation Programs, and the ever-changing Regulatory landscape. All members are encouraged to share!

*** “Roundtable Reconnaissance/Open Mic/ etc.” Sessions: These asterisked parts of the agenda are designed to allow members to share important information and learn from what others are doing. Therefore, please come prepared to share some key issues that you are encountering within your health system or in key markets. As part of these roundtable sessions, we also encourage members to bring sample documents or other information they feel may be of benefit to other members. Provide an electronic copy or 40 printed copies of any handout materials you are willing to share.

These sessions are only as valuable as you and other members make it; your active involvement and willingness to share will benefit the entire group.

PowerPoint “micro-presentations” (i.e. 3-5 minutes) are also welcome. Please email this information to Stacy Reiff, ops@theleadersboard.com as soon as possible.
