

Introduction to Oncology for the Healthcare Provider

Thursday, February 5, 2026
UPMC Hillman Cancer Center, Remote Attendance

Learning Objectives

At the conclusion of this activity, participants should be able to:

1. Define the pathophysiology of malignant disease and factors that can increase a person's risk of developing cancer.
2. Discuss the role of different treatment modalities in the management of patients with cancer.
3. Identify supportive care, symptom management, and psychosocial needs of patients with cancer.
4. Recall proper guidelines surrounding those who are administering or receiving antineoplastic therapy or immunotherapy.
5. Recognize the signs, symptoms, and diagnostic criteria needed to manage the patient experiencing an oncologic emergency.
